Explanatory Notes on the Quarterly Report – 31 December 2017 Amounts in RM thousand unless otherwise stated

This interim financial information of Felda Global Ventures Holdings Berhad ('FGVH' or 'Group') is prepared in accordance with the requirements of paragraph 9.22 of the Main Market Listing Requirements of Bursa Malaysia Securities Berhad and complies with the requirements of the Financial Reporting Standard ('FRS') No. 134 – Interim Financial Reporting.

The Unaudited Condensed Interim Financial Information should be read in conjunction with FGVH audited financial statements for the financial year ended 31 December 2016. These explanatory notes attached to the Unaudited Condensed Interim Financial Information provide an explanation of events and transactions that are significant to an understanding of the changes in the financial position and performance of the Group since the financial year ended 31 December 2016.

1. Basis of Preparation

(a) General

The accounting policies and presentation adopted for this interim financial report are consistent with those adopted for the annual financial statements for the financial year ended 31 December 2016, except for the adoption of the new Financial Reporting Standards ("FRS"), Amendments to FRS and IC Interpretations with effect from 1 January 2017.

The Group includes transitioning entities and has elected to continue to apply FRS during the financial year. The Group will be adopting the new IFRS-compliant framework, Malaysian Financial Reporting Standards ("MFRS") for financial year beginning on 1 January 2018. In adopting the new framework, the Group will be applying MFRS 1 "First-time Adoption of MFRS".

- (b) Accounting pronouncements that are effective and have been adopted by the Group as at 1 January 2017:
 - Amendments to FRS 107 "Statement of Cash Flows" Disclosure Initiative
 - Amendments to FRS 112 "Income Taxes" Recognition of Deferred Tax Assets for Unrealised Losses
 - Annual Improvements to FRS 12 "Disclosures of Interests in Other Entities"

The adoption of the above amendments to existing standards did not have any significant impact on the current or any prior financial year and are not likely to affect future financial periods.

Explanatory Notes on the Quarterly Report – 31 December 2017 (continued) Amounts in RM thousand unless otherwise stated

2. Seasonal or Cyclical Factors

Global sales of oils and fats products follow a similar pattern where sales increases ahead of festivities due to increased consumer demand. In addition, the harvest of fresh fruit bunches ("FFB") at palm oil plantations tends to increase in the second half of the financial year as a result of the rainfall pattern in Malaysia, which leads to a greater supply of CPO and PK during the second half of the financial year as FFB is immediately processed following its harvest.

Sales of refined oils and sugar products in Malaysia typically increase slightly during the months leading up to major holidays and festivals in Malaysia, especially Hari Raya and Chinese New Year, due to increased consumer demand for cooking oil and refined sugar.

3. Unusual Items Affecting Assets, Liabilities, Equity, Net Income or Cash Flows

There were no material or unusual items affecting FGVH's assets, liabilities, equity, net income or cash flows during the financial period under review.

4. Material Changes in Estimates

Other than the changes in assumptions made to the fair value changes of financial liabilities as disclosed in Note 19, there were no other material changes in the estimates of amounts reported in the prior interim period of the current financial year or the interim period of the previous financial year that have a material effect on the results for the current quarter under review.

5. Debt and Equity Securities

There were no issuances, cancellations, repurchases, resale and repayments of debt and equity securities during the financial period under review.

6. Dividends

The Directors declared an interim dividend payment of 5.0 sen per share on 3,648,151,500 ordinary shares under single-tier system for the quarter ended 30 September 2017. The dividend totaling RM182.41 million was paid on 28 December 2017.

Explanatory Notes on the Quarterly Report – 31 December 2017 (continued) Amounts in RM thousand unless otherwise stated

13. Review of Group Performance (continued)

(a) Plantation Sector

Plantation Sector registered a significant improvement in their performance with a profit of RM554.18 million for the financial year ended 31 December 2017 from RM233.78 million in previous year on the back of higher CPO sales margin as average CPO price realised increased to RM2,792 per mt from RM2,560 per mt in 2016 while the CPO production cost was similar to previous year.

Operationally, CPO production increased by 12.3% to 2.99 million mt associated with the growth in FFB production from 3.91 million mt in 2016 to 4.26 million mt in 2017. OER was lower at 19.83% compared to 20.68% achieved in the previous year.

Higher margin was reported in the kernel crushing and fertilizer business due to increase in sales volume and gain in foreign exchange in fertilizer business compared to loss in foreign exchange in 2016.

In addition, there was a gain on disposal on long term investment amounted to RM73.13 million and improvement in share of results of joint ventures by RM32.97 million mainly in downstream segment.

The increase in Sector's profit was partially offset by higher fair value charge in LLA of RM292.85 million compared to RM68.28 million posted last year.

(b) Sugar Sector

Sugar Sector's profit declined to RM1.89 million from RM151.81 million in previous year affected by higher raw sugar material costs and weakened Ringgit despite improvement in selling price.

(c) Logistics and Others ("LO") Sector

LO Sector recorded a higher profit of RM45.18 million compared to RM7.96 million in previous year mainly due to higher throughput and tonnage carried by Group's transport operation in tandem with the increase in CPO production volume. In addition, Others Sector recorded 30% lower losses supported by higher selling price in rubber business.

13. Material Changes in the Quarterly Results Compared to Preceding Quarter (continued)

(a) Plantation Sector

The Plantation Sector's profit grew almost threefold to RM299.05 million in current quarter compared to RM107.13 million in preceding quarter driven by higher average CPO price realized of RM2,723 per mt compared to RM2,665 per mt in preceding quarter and CPO sales volume that rose by 3.4%. FFB production for the current quarter dropped to 1.19 million mt from to 1.23 million mt in preceding quarter. Better RBDPKO margin was posted in kernel crushing business in current quarter as the average price increased to 25.3% against preceding quarter. The results for the current quarter also include a gain on disposal of long term investment amounted to RM73.13 million which boosted the sector's profit in current quarter, compounded by lower fair value charge in LLA of RM68.70 million compared to RM103.58 million charged in preceding quarter.

(b) Sugar Sector

Sugar Sector recorded an improved performance with a profit of RM27.85 million compared to RM15.64 million in preceding quarter supported by lower raw sugar material costs. (c) LO Sector

19. Fair Value Changes of Financial Instruments (continued)

The fair value of financial instruments traded in active markets is based on quoted market prices at the statement of financial position date. The quoted market price used for financial assets held by the Group is the current bid price. These instruments are included in Level 1. Instruments included in Level 1 comprise primarily equity investments listed in Bursa Malaysia Securities Berhad or foreign stock exchanges classified as trading securities or available for sale and commodity derivatives quoted on Bursa Malaysia Derivatives Berhad (formerly known as Malaysia Derivatives Exchange Berhad ("MDEX")) for palm oil and other foreign commodity exchanges.

The fair value of financial instruments that are not traded in an active market (for example, foreign currency forward contracts) is determined by using valuation techniques. These valuation techniques maximise the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in Level 2. Instruments included in Level 2 comprise foreign currency forward contracts.

If one or more of the significant inputs is not based on observable market data, the instrument is included in Level 3. Instruments included in Level 3 comprise LLA liability and unquoted available-for-sale financial assets.

The following table presents the changes in Level 3 instruments during the financial year:

	Financial	
	period ended	Financial
	31 December 2017	<u>year 2016</u>
LLA liability	-	•
1 January	4,407,564	4,627,195
Fair value changes charged		
to profit or loss	292,845	68,275
Repayment during the financial year	(307,129)	(287,906)
31 December	4,393,280	4,407,564
Available for sale financial assets		
1 January	247,543	251,351
Addition	10,585	5,488
Disposal	(126,206)	-
Liquidation of a subsidiary	-	(1,613)
Fair value losses transferred to		
available-for-sale reserves	(11,374)	(7,684)
Reclassification of reserve on derecognition		
of available-for-sale financial assets	(33,675)	-
31 December	86,873	247,542

Fair value changes for the LLA liability has been measured based on assumptions made on discount rate, crude palm oil prices, fresh fruit bunches prices, palm kernel prices, average yield of fresh fruit bunches, lease term of planted oil palm and rubber and estate replanting fixed cost. Any changes on assumptions used will cause a material variation of the liability.

22. Significant events

(i) On 23 November 2016, Group President/Chief Executive Officer of FGVH had mentioned there are indeed some unusual stock losses which management has detected in Felda Iffco Gida Sanayi, Turkey (FIGS), a subsidiary of Felda Iffco Sdn Bhd ("FISB Group"), a jointly controlled entity. As indicated in our Fourth Quarter 2016 Quarterly Announcement, the Audit and Forensic reports are completed. They confirmed the losses as previously reported, with no further losses to be accounted for.

A summary of the audit findings were that the company incurred losses due to negative variable margins, actual margins being lower than declared margins, and stock shortages which were undisclosed to the Board of Directors and Shareholders mainly via value adjustments, introduction of excess production batches and overstating receivables.

The Board of FIGS has since introduced several measures to prevent such occurrence again including the appointment of a new Chief Financial Officer whose immediate task is to review and improve internal controls found to be weak. The Board has also authorised the replacement of the current Enterprise Reporting System (ERP) to SAP, which will be centrally monitored and accessible to FISB management in Malaysia on an "online" basis. In addition, an employee of FGVH has been seconded to FIGS as the Deputy CFO, with responsibility over the production costing, inventory and Group reporting functions. The Board of FIGS further monitors these implementation of improvements closely including physical meetings scheduled at least once every 2 months.
