Notes To The Condensed Consolidated Interim Financial Statements
For The Period Ended 30 September 2018

1 Basis of Preparation

The condensed consolidated interim financial statements are unaudited and have been prepared in accordance with the requirements of MFRS 134: Interim Financial Reporting and paragraph 9.22 of the Listing Requirements of Bursa Malaysia Securities Berhad.

The unaudited financial report should be read in conjunction with the audited financial statements for the year ended 31 December 2017. These explanatory notes attached to the unaudited financial statements provide an explanation of events and transactions that are significant to an understanding of the changes in the financial position and performance of the Group since the financial year ended 31 December 2017.

2 Changes in Accounting Policies

The accounting policies, methods of computation and basis of consolidation adopted by the Group in this unaudited financial report are consistent with those used in the preparation of the audited financial statements for the financial year ended 31 December 2017 except for the adoption of new Malaysian Financial Reporting Standards ("MFRS") that are effective for financial period beginning on or after 1 January 2018 as below:

a) Adoption of MFRS 1 and Annual Improvement to MFRS 1 'First-time Adoption of Malaysian Financial Reporting Standards'

The Group had consistently applied the same accounting policies in its opening MFRS statements of financial position as at 1 January 2017 (transition date) and throughout all years presented, as if these policies had always been in effect. Save for the required presentation of three statements of financial position in the first MFRS financial statements, there is no other significant impact on the Group's financial results and position, and changes to the accounting policies of the Group arising from the adoption of this MFRS framework other than included in (b).

b) MFRS 141 'Agriculture' and Amendments to MFRS 116 'Property, Plant and Equipment'

The Amendments to MFRS 116 and MFRS 141 introduce a new category of biological asset, the bearer plant. A bearer plant is a living plant that is used in the production and supply of agriculture produce, is expected to bear produce for more than one period, and has remote likelihood of being sold as agriculture produce except for incidental scrap sales.

Agriculture produce growing on bearer plants are measured at fair value less costs to sell, with fair value changes recognized in profit or loss as the produce grows. However, there are two occasions where the standard permits departure from the fair value, which are at early stage of an asset's life and when fair value cannot be measured reliably on initial recognition.

In respect of the agriculture produce, the Group has adjusted for the impact of the recognition of its agriculture produce measured at fair value less cost to sell upon adoption of the standard.
