Profit attributable to owners of the Company	162	5,339	(5,177)	-97.0%	

The revenue recorded for the current quarter and the preceding year corresponding quarter was RM230.44 million and RM236.36 million respectively, remained fairly consistent.

Our main business segments continued to be trading and processing of steel products, which collectively contributed approximately 99.8% of our total revenue for the current quarter. The trading segment and the processing segment contributed revenue of 34.4% and 65.4% respectively for the current quarter whereas the trading segment and the processing segment contributed revenue of 35.2% and 64.7% respectively for the preceding year corresponding quarter.

Our gross profit decreased slightly by 0.7% or RM0.12 million, from RM18.12 million for the preceding year corresponding quarter to RM18.00 million for the current quarter, mainly due to inventories written down of RM2.70 million in the current quarter (none for the preceding year corresponding quarter) as certain inventories were measured at its estimated net realisable value, despite higher overall gross profit margin by 1.3 percentage points, from 7.7% for the preceding year corresponding quarter to 9.0% for the current quarter.

The other income for the current quarter was RM0.39 million as compared to RM0.73 million for the preceding year corresponding quarter, decreased by RM0.34 million, as the result of the following:

- lower realised and unrealised gain on foreign exchange by RM0.34 million and RM0.18 million respectively due to reversal of realised and unrealised gain on foreign exchange of RM0.30 million and RM0.15 million respectively recorded for the current quarter as opposed to realised and unrealised gain on foreign exchange of RM0.04 million and RM0.03 million respectively recorded for the preceding year corresponding quarter; and
- lower gain on disposal of plant and equipment by RM0.07 million; partially mitigated by
- increase in interest income by RM0.11 million; and
- higher insurance claims by RM0.17 million.

B1. Review of Performance (Cont'd)

Current Quarter Compared To Preceding Year Corresponding Quarter (Cont'd)

Our operating costs increased by approximately RM1.85 million from RM9.51 million for the preceding year corresponding quarter to RM11.36 million for the current quarter, as the result of the following:

- 1. Increase in distribution costs by RM0.45 million, mainly due to:
 - increase in staff related costs by RM0.20 million mainly caused by increase in salaries and wages;
 - increase in petrol, parking, toll, road tax, insurance, transportation, travelling, accommodation and upkeep of motor vehicles expenses by RM0.24 million.
- 2. Increase in administrative costs by RM0.63 million mainly due to:
 - higher directors' remuneration and staff related costs by RM0.24 million mainly resulted from higher provision of fees for directors;
 - increase in depreciation charges by RM0.10 million;
 - higher license fees and upkeep of office equipment expenses by RM0.15 million; and
 - higher insurance, road tax and travelling expenses by RM0.15 million.
- 3. Increase in net addition of impairment losses on financial instruments (trade receivables) by RM0.57 million due to net addition of impairment losses on financial instruments of RM0.09 million for the current quarter as opposed to net reversal of impairment losses on financial instruments of RM0.48 million for the preceding year corresponding quarter.
- 4. Increase in other costs by RM0.21 million, mainly due to:
 - realised and unrealised loss on foreign exchange of RM0.05 million and RM0.07 million respectively recorded for the current quarter; and
 - higher quit rent and assessment expenses by RM0.05 million.

Total finance costs for the current quarter was RM6.18 million, increased by RM0.83 million as compared to RM5.35 million for the preceding year corresponding quarter. This was mainly caused by higher profit charges for islamic financing by RM0.43 million as well as higher interest expense for overdraft facilities and term loans in the current quarter by RM0.42 million and RM0.29 million respectively, mainly due to higher utilisation of aforementioned facilities. The increase was, however, partially offset by lower interest expense for bankers' acceptances by RM0.32 million.

Based on the foregoing factors, our profit before tax decreased by 78.9% or RM3.15 million, from RM3.99 million for the preceding year corresponding quarter to RM0.84 million for the current quarter.

This was mainly caused by higher profit charges for islamic financing by RM1.11 million as well as higher interest expense for term loans in the current quarter by RM1.06 million, mainly due to higher utilisation of aforementioned facilities and higher profit/interest rates for the current financial year-to-date as compared to the preceding financial year-to-date resulted from the increase of Overnight Policy Rate by Bank Negara Malaysia in May 2023.

Based on the foregoing factors, our profit before tax for the current financial year-to-date decreased by 50.1% or RM16.52 million as compared to preceding financial year-to-date, from RM32.95 million for the preceding financial year-to-date to RM16.43 million for the current financial year-to-date.

Our processing facilities which include an extensive range of cutting, levelling, shearing, profiling, bending and finishing are catered for specific product requirements of our large customer base from diverse industries and to provide a one-stop solution to potential customers. The cutting and profiling facilities include a fiber laser cutting machine complete with automated loading and unloading facilities for inputs and outputs with overall processing speed of up to 5 times more than conventional laser cutting machines. In addition, our Group also has downstream manufacturing facilities for production of welded steel pipes with Phase 1 of the facilities having 4 production lines in a factory building while a newly completed Phase 2 of the facilities comprise a warehouse and a factory building specifically housing a production line for larger diameter welded steel pipes.

The profitability of our business is very much dependent on prices of our steel products besides demand from customers. In this respect, global factors such as volatility in commodities and crude oil prices as well as significant fluctuation in exchange rate of foreign currencies against Ringgit Malaysia will affect our suppliers pricing and hence the profitability of our steel products as some of our merchandise and raw materials are sourced from overseas. With regards to the demand from our customers, our Group is leveraging on its large and diverse customer base which in turn dependent on the condition of economies they thrived in, their resilience towards crisis as well as policy measures of the government.

According to International Monetary Fund, global growth is expected to remain stable yet underwhelming. However, notable revisions have taken place beneath the surface since April 2024, with upgrades to the forecast for the United States offsetting downgrades to those for other advanced economies, in particular, the largest European countries. Likewise, in emerging market and developing economies, disruptions to production and shipping of commodities, especially oil, conflicts, civil unrest, and extreme weather events have led to downward revisions to the outlook for the Middle East and Central Asia and that for sub-Saharan Africa. These have been compensated for by upgrades to the forecast for emerging Asia, where surging demand for semiconductors and electronics, driven by significant investments in artificial intelligence, has bolstered growth, a trend supported by substantial public investment in China and India.

Locally, growth in the second half of 2024 will be driven by domestic spending with continued strong support from external demand. On the domestic front, household spending will be underpinned by continued employment and wage growth as well as policy measures. Investment activities will be driven by progress in multi-year projects across private and public sectors. Catalytic initiatives announced in national master plans and the higher realisation of approved investments are also key drivers for investment activities. Externally, the ongoing global tech upcycle and continued strong demand for non-electrical and electronics goods are expected to lift exports. Improvement in tourist arrivals and spending are expected to continue. Upside risks to growth prospects include greater spillover from the tech upcycle, robust tourism activities, and faster implementation of existing and new investment projects. Downside risks to growth prospects stem from a downturn in external demand, an escalation in geopolitical conflicts and lower-than-expected commodity production.

B3. Commentary on Prospects (Cont'd)

The current fluctuation in steel prices and the direction of Ringgit Malaysia against other major currencies may affect our Group's profit margin. Therefore, our Group will continue to remain vigilant on the movement of steel prices and related foreign currencies, and will take proactive measures including negotiating forward contracts, where necessary, as well as prudent inventory management, to reduce any negative impact which may arise therefrom. Our Group will also continue to enhance the operating capabilities and efficiencies in meeting customer orders while keeping our operating costs at a manageable level.

In this respect, our Board is cautiously optimistic that the Group will achieve positive results for final quarter of 2024.

B4. Variance of Forecast Profit and Profit Guarantee

The negative current income tax for the current quarter was the result of reversal of income tax provided in previous quarters, mainly arising from higher availability of capital allowances due to addition of qualifying capital expenditure by a subsidiary company in the current quarter. The effective tax rate for the current financial year-to-date is higher than the statutory rate of 24% mainly due to certain expenses which are not deductible for tax purposes and absence of group relief for losses incurred by certain companies within the Group.
