#### QUARTERLY REPORT FOR THE THIRD QUARTER ENDED 30 SEPTEMBER 2016

# PART A – EXPLANATORY NOTES PURSUANT TO MALAYSIAN FINANCIAL REPORTING STANDARD 134

#### 1. BASIS OF PREPARATION

The unaudited quarterly report has been prepared in accordance with the requirements of MFRS 134, "Interim Financial Reporting", paragraph 9.22 and Appendix 9B of the Bursa Malaysia Securities Berhad Main Market Listing Requirement ("Bursa Securities Listing Requirements") and should be read in conjunction with the audited financial statements for the financial year ended 31 December 2015.

The significant accounting policies and methods adopted for the unaudited condensed financial statements are consistent with those adopted for the audited financial statements for the financial year ended 31 December 2015; with an additional accounting policy and methods for non-current assets held for sale under MFRS 5: An non-current assets held for sale and discontinued operation.

Non-current assets (or disposal groups of assets) are classified as assets held for sale when their carrying amount is to be recovered principally through a sale transaction and a sale is considered highly probable. They are stated at the lower of carrying and fair value less costs to sell.

As at 30 September 2016, the Group's current liabilities exceeded their current assets by RM87,347,238.

The Group has taken steps to review the existing loan repayment schedule and the capital commitment for vessels under construction. As at the date of this report 28 November 2016, the Group has completed all of three restructuring and rescheduling of the loan repayments with the banks to allow the Group to defer certain amount of the current loan obligations. For the period ended 30 September 2016, we have reflected the impact of the reduction in borrowings due in the next twelve months for two loans. The Group has also deferred the delivery and payment for vessels under construction. In addition, the Group has obtained a new credit facility for its working capital requirements and will also be able to obtain the required financial support from its immediate holding company, if necessary.

With the steps taken above, the Directors are of the view that the Group will be able to generate sufficient cash inflows from the charter hire contracts within the next twelve months from the reporting date to meet working capital requirements and repayment of existing loan obligations, and to carry on their business without significant curtailment of operations. The Directors believe that the Group are able to realise their assets and discharge their liabilities in the normal course of business and that the financial position will be improved through future operating profits and cash flows. Thus, the Directors believe no material uncertainty exists that may cast significant doubt on the Group's ability to continue as going concerns.

As such, the Directors believe that it is appropriate to prepare this report on a going concern basis.

The adoption of the following MFRSs and Amendments to MFRSs that came into effect on 1 January 2016 did not have any significant impact on the unaudited condensed consolidated financial statements upon their initial application.

- Amendments to MFRS 116 Property, Plant and Equipment and MFRS 138 Intangible Assets-Clarification of Acceptable Methods of Depreciation and Amortisation (effective from 1 January 2016)
- Amendments to MFRS10 Consolidated Financial Statements and MFRS 128 Investment in Associates and Joint Ventures—Sale or Contribution of Assets between an Investor and its Associates/ Joint Ventures (Effective from 1 January 2016)
- Amendments to MFRS 127 Separate Financial Statements Equity Accounting in Separate Financial Statements (Effective from 1 January 2016)
- Annual Improvements to MFRSs 2012-2014 Cycle (Amendments to MFRS 5 Non-Current Assets Held for Sale and Discontinued Operations, MFRS 7 Financial Instruments: Disclosures, MFRS 119 Employee Benefits, MFRS 134 Interim Financial Reporting) (effective from 1 January 2016)

#### QUARTERLY REPORT FOR THE THIRD QUARTER ENDED 30 SEPTEMBER 2016

# PART A – EXPLANATORY NOTES PURSUANT TO MALAYSIAN FINANCIAL REPORTING STANDARD 134 (continued)

#### 1. BASIS OF PREPARATION (continued)

#### MFRSs and amendments to MFRSs that are applicable to the Group but not yet effective

Malaysian Accounting Standards Board had issued the following new standards and amendments to standards which are effective for the financial period beginning on or after 1 January 2016. The Group did not early adopt these new standards, amendments and improvements to published standards.

- MFRS 9 Financial Instruments (effective from 1 January 2018)
- MFRS 15 Revenue from Contracts with Customers (effective from 1 January 2017)
- MFRS 16 Leases (effective from 1 January 2019)

The initial application of the abovementioned accounting standards and amendments to published standards are not expected to have any material impacts to the financial statements of the Group and of the Company except as mentioned below:

• MFRS 9 'Financial Instruments' (effective from 1 January 2018) will replace MFRS 139 "Financial Instruments: Recognition and Measurement". The complete version of MFRS 9 was issued in November 2014.

FRS 9 retains but simplifies the mixed measurement model in MFRS 139 and establishes three primary measurement categories for financial assets: amortised cost, fair value through profit or loss and fair value through other comprehensive income ("OCI"). The basis of classification depends on the entity's business model and the contractual cash flow characteristics of the financial asset. Investments in equity instruments are always measured at fair value through profit or loss with a irrevocable option at inception to present changes in fair value in OCI (provided the instrument is not held for trading). A debt instrument is measured at amortised cost only if the entity is holding it to collect contractual cash flows and the cash flows represent principal and interest.

For liabilities, the standard retains most of the MFRS 139 requirements. These include amortised cost accounting for most financial liabilities, with bifurcation of embedded derivatives. The main change is that, in cases where the fair value option is taken for financial liabilities, the part of a fair value change due to an entity's own credit risk is recorded in other comprehensive income rather than the income statement, unless this creates an accounting mismatch.

There is now a new expected credit losses model on impairment for all financial assets that replaces the incurred loss impairment model used in MFRS 139. The expected credit losses model is forward-looking and eliminates the need for a trigger event to have occurred before credit losses are recognised.

- MFRS 15 'Revenue from contracts with customers' (effective from 1 Jan 2017) deals with revenue recognition and establishes principles for reporting useful information to users of financial statements about the nature, amount, timing and uncertainty of revenue and cash flows arising from an entity's contracts with customers. Revenue is recognised when a customer obtains control of a good or service and thus has the ability to direct the use and obtain the benefits from the good or service. The standard replaces MFRS 118 'Revenue' and MFRS 111 'Construction contracts' and related interpretations.
- MFRS 16 'Leases' (effective from 1 January 2019) supersedes MFRS 117 'Leases' and the related interpretations. Under MFRS 16, a lease is a contract (or part of a contract) that conveys the right to control the use of an identified asset for a period of time in exchange for consideration. MFRS 16 eliminates the classification of leases by the lessee as either finance leases (on balance sheet) or operating leases (off balance sheet). MFRS 16 requires a lessee to recognise a "right-of-use" of the underlying asset and a lease liability reflecting future lease payments for most leases.

The right-of-use asset is depreciated in accordance with the principle in MFRS 116 'Property, Plant and Equipment' and the lease liability is accreted over time with interest expense recognised in the income statement. For lessors, MFRS 16 retains most of the requirements in MFRS 117. Lessors continue to classify all leases as either operating leases or finance leases and account for them differently.

# PART A – EXPLANATORY NOTES PURSUANT TO MALAYSIAN FINANCIAL REPORTING STANDARD 134 (continued)

#### 11. FAIR VALUE MEASUREMENTS

The table below shows the carrying amounts and fair value of the borrowings, by valuation method. The different levels have been defined as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability,

either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable

inputs).

The fair value of the borrowings are estimated using the income approach, by discounting the cash flows based on the market interest rates of a comparable instrument. This is a Level 2 fair value measurement.

		Carrying amount		Fair Value
	AS AT	AS AT	AS AT	AS AT

#### 15. ANALYSIS OF PERFORMANCE

15.1 Review of performance for the current quarter (Quarter ended 30 September 2016) against the corresponding quarter (Quarter ended 30 September 2015):

#### (i) Revenue

Revenue decreased by RM6.1 million or 8.8%, from RM69.1 million for the quarter ended 30 September 2015 to RM63.0 million for the quarter ended 30 September 2016. The decreased was primarily due to lower fleet utilisation rate of 59.1% for the quarter ended 30 September 2016 as compared to 61.9% for the quarter ended 30 September 2015, arising from completion of a long-term contract, vessels dry-dock and laid-up as well as continuous low activities in oil and gas industry. The decrease was also contributed by lower average daily charter rate ("DCR") for new contracts awarded in the current quarter. However, this was partially off-set by contribution from two new long term contracts for Straight Supply Vessel ("SSV") during the quarter.

#### (ii) Gross profit

The cost of sales decreased by RM3.8 million or 9.2%, from RM41.5 million for the quarter ended 30 September 2015 to RM37.7 million for the quarter ended 30 September 2016, due to the cost saving initiatives in relation to fuel consumption monitoring and vessels laid-up, domestic safe manning and off-set by increased in vessels repair and maintenance costs during the current quarter. The decrease were also due to lower depreciation charge for vessels impaired during the financial year ended 2015.

Consequently, the Group's gross profit decreased by RM2.3 million or 8.3%, from RM27.6 million for the quarter ended 30 September 2015 to RM25.3 million for the quarter ended 30 September 2016.

### (iii) Administrative expenses

The administrative expenses decreased by RM0.6 million or 5.0%, from RM12.0 million for the quarter ended 30 September 2015 to RM11.4 million for the quarter ended 30 September 2016 primarily due to lower payroll cost and off-set by one-off professional fees for corporate and financing exercises during the current quarter under review.

#### (iv) Other expenses

Other expenses decreased by RM0.8 million or 100%, from RM0.8 million for the quarter ended 30 September 2015 to Nil for the quarter ended 30 September 2016, due to the intangible assets has been fully amortised as at 31 December 2015.

The decreased was primarily due to decreased in vessel utilisation rate from 60.9% for the period ended 30 September 2015 to 52.7% for the period ended 30 September 2016. This is due to completion of certain long term contracts and longer monsoon off-hires during the current period as well as continuous lower demand and lower activities in oil and gas industry.

The cost of sales decreased by RM14.3 million or 11.4% from RM125.9 million for the period ended 30 September 2015 to RM111.6 million for the period ended 30 September 2016, primarily due to the cost saving initiatives in relation to fuel consumption monitoring, vessels laid-up, domestic safe manning and off-set by increased in vessels repair and maintenance costs and spare parts to ensure the vessels readiness for charter. The decrease were also due to lower depreciation charge for vessels impaired during the financial year ended 2015.

Consequently, the Group's gross profit decreased by RM13.3 million or 17.6% from RM75.4 million for the period ended 30 September 2015 to RM62.1 million for the period ended 30 September 2016 mainly due to lower revenue.

#### 16. PROSPECTS FOR THE FINANCIAL YEAR ENDING 31 DECEMBER 2016

The upstream exploration and production activities in Malaysia is expected to continue to underpin the demand for OSV. The global political concerns and volatility of the oil price during the period under review contributed to highly challenging market condition for OSV which has largely impacted the OSV operators, including the Company. In addition, OSV operators are also impacted by increasing pressure to conserve cash and secure contracts to drive utilisation rates upwards to sustain the business.

As the cost optimisation and cash conservation initiatives are largely completed, the Group continue to focus on securing new contracts and maximisation of utilisation rates through competitive tendering for domestic and regional contracts, as well as leveraging on its expanded presence in Brunei.

In view of this, the Board of Directors remain cautious on the Group's financial results for the financial year ending 31 December 2016.
