#### 12. FAIR VALUE MEASUREMENTS

The table below shows the carrying amounts and fair value of the borrowings, by valuation method. The different levels have been defined as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability,

either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The fair values of the borrowings are estimated using the income approach, by discounting the cash flows based on the market interest rates of a comparable instrument. This is a Level 2 fair value measurement.
