- Underlying assets for Islamic financing facilities
  - i. In January 2013, the Company entered into a notional sale and leaseback of certain of its plantation land and bearer plants with Sime Darby Global Berhad ("Sime Darby Global"), a special purpose vehicle established by Sime Darby Berhad ("SDB"), the immediate holding company. This sale and leaseback arrangement is solely to facilitate the issuance of Islamic Trust Certificates ("Sukuk") by Sime Darby Global and it does not represent a collateralisation nor involve a transfer of registered land title. On 23 May 2017, the Company acquired the entire equity interest of Sime Darby Global.

The carrying amount of the assets used as underlying Sukuk assets as at 30 June 2017 amounted to RM292 million (30 June 2016: RM820 million, 30 June 2015: RM774 million, 1 July 2014: RM819 million).

ii. During the financial year ended 30 June 2016, a subsidiary of the Company entered into a notional sale and leaseback of certain of its plantation land and bearer plants with SDB. This sale and leaseback arrangement is solely to facilitate the issuance of Perpetual Subordinated Sukuk Programme ("Perpetual Sukuk") by SDB. The structure does not represent collateralisation and there was no transfer of registered land title. On 23 June 2017, the Perpetual Sukuk was novated from SDB to the Company. The sale and leaseback agreement was similarly novated from SDB to the Company.

### e. Impairment

During the financial year ended 30 June 2015, the Group carried out an assessment to determine the recoverable amount of property, plant and equipment ("PPE") in one of its downstream cash generating units (CGU) as the facility was idle. An impairment of RM14.5 million was recognised as the carrying amount of the PPE exceeded the fair value less costs of disposal of those assets. The Group made full impairment of the remaining carrying amount of RM7.4 million (except for certain assets which will be transferred to another subsidiary) during the financial year ended 30 June 2017 as it did not foresee the facility will be revived.

The Group had also during the financial year ended 30 June 2017, carried out an impairment review to determine the recoverability of the Group's PPE in Liberia as a result of a change in the Group's strategic investment decisions in Liberia following the continuing losses incurred by its Liberia's operations.

For the purpose of this review, the recoverable amount of the Group's PPE in Liberia, comprising the oil palm estates and oil palm mill were valued separately as two CGUs by an independent professional valuer. The recoverable amounts of these CGUs were determined based on the higher of fair value less cost of disposal and value-in-use. No impairment charge was required on the oil palm mill as the fair value less cost of disposal exceeded its carrying value.

An impairment loss of RM202.3 million was recorded on the oil palm estates in Liberia as the carrying amount of the oil palm estate's PPE exceeded its fair value less cost of disposal of RM315.6 million. Estimates of fair values on the oil palm estates as determined by the professional valuer were based on the income approach and are within Level 3 of the fair value hierarchy. The key assumptions adopted in the valuation and the sensitivity analysis of each of these assumptions assuming all other variables are held constant are as follows:

| Key assumptions                    | Base case         | <u>Sensitivity</u>    | Additional impairment |
|------------------------------------|-------------------|-----------------------|-----------------------|
|                                    |                   |                       | RM' million           |
| Crude Palm Oil ("CPO") price       | USD 750 per mt    | Reduced by 5%         | 52                    |
| Fresh Fruit Bunches ("FFB") yields | 7 to 23 mt per ha | Reduced by 1mt per ha | 48                    |
| Average upkeep costs               | USD668 per ha     | Increased by 10%      | 17                    |
| Discount rate                      | 12% per annum     | Increased by 1%       | 25                    |

### f. Changes in estimate of useful life

Effective from 1 July 2015, the Group changed its estimated useful life for certain buildings from 9 - 20 years to 10 - 26 years, and certain plant and machinery from 5 - 30 years to 7 - 40 years in conformity with the change in the expected pattern of consumption of the future economic benefits. As a result, the Group's depreciation charge decreased by RM27.2 million for financial year ended 30 June 2016.

There is no change in the estimated useful lives of property, plant and equipment during the financial year ended 30 June 2017.

### NOTES TO THE FINANCIAL STATEMENTS FOR THE FINANCIAL YEAR ENDED 30 JUNE 2017 (CONTINUED)

### BIOLOGICAL ASSETS (CONTINUED)

The biological assets of the Group and the Company comprised:

### (i) Oil palm

Oil palm represents the fresh fruit bunches ("FFB") of up to 2 weeks prior to harvest for use in the Group's and Company's palm product operations. During the financial year ended 30 June 2017, the Group and the Company harvested approximately 9,784,046 metric tonnes ("MT") of FFB (2016: 9,620,506 MT, 2015: 9,637,549 MT) and 3,717,119 MT of FFB (2016: 3,577,580 MT, 2015: 4,059,124 MT) respectively. The quantity of unharvested FFB of the Group and the Company as at 30 June 2017 included in the fair valuation of FFB was 385,688 MT (2016: 292,661 MT, 2015: 443,586 MT) and 161,457 MT (2016: 118,226 MT, 2015: 184,568 MT) respectively.

In arriving at the fair value, the Group and the Company adopted the income approach which considers the net present value of all directly attributable cash inflows, cash outflows and imputed contributory asset charges where no actual cash flows associated with the use of assets essential to the agricultural activity are accounted for as disclosed in Note 4(c)(i) to the financial statements. Changes to the assumed prices of the FFB and tonnage included in the valuation will have a direct effect on the reported valuation.

### (ii) Growing canes

Growing canes represent the standing canes prior to harvest whereby the values are dependent on the age, sucrose content and condition as at the statement of financial position date as disclosed in Note 4(c)(ii). During the financial year ended 30 June 2017, the Group harvested approximately 269,200 MT (2016: 238,158 MT, 2015: 54,090 MT) of canes. The estimated quantity of unharvested canes as at 30 June 2017 included in the fair valuation of FFB of the Group was 233,344 MT (2016: 265,808 MT, 2015: 211,642 MT).

### (iii) Livestock

Livestock comprise the cattle livestock included within the Group's beef production operations. Cattle livestock are generally fed for 120 days prior to use for beef production. During the financial year ended 30 June 2017, the Group produced 1,923.4 tonnes (2016: 1,874.6 tonnes, 2015: 591.8 tonnes) of beef. The quantity of cattle as at 30 June 2017 included in the fair values of livestock was 24,803 head (2016: 26,014 head, 2015: 24,885 head).

The fair values of livestock are based on the Groups' assessment of age, average weights and market values of the livestock at the statement of financial position date. If the selling prices of livestock changes by 10%, fair value changes in livestock would have increased or decreased by approximately RM5.6 million (2016:RM5.3 million, 2015: RM5.0 million) respectively.

Management believes that there are no reasonably possible changes in any of the key assumptions used that would cause the carrying amounts of the investments in subsidiaries to materially exceed the recoverable amounts except for the investment in a subsidiary, Sime Darby Plantation (Liberia) Inc. ("Liberia").

A review was carried out over the recoverability of cost of investment in Liberia as a result of the change in the management's strategic investment decisions which were identified as impairment indicators for the investment in the operation in Liberia.

The recoverable amount of the subsidiary is determined based on fair value less costs to sell method (Level 3 of the fair value hierarchy). The key assumptions for the impairment assessment are disclosed in Note 16 to the financial statements.

As a result of the impairment assessment, an impairment loss of RM303,658,371 was recorded in operating expense in the Company's statement of profit or loss for the current financial year.

Based on the sensitivity analysis performed by the Company, the impact of 1% increase in the discount rate used, which is a key assumption, will result in additional impairment loss of approximately RM25 million.

The amounts due from subsidiaries above are deemed as capital contribution to subsidiaries as the repayment of these amounts are neither fixed nor expected.

The Group's equity interest in the subsidiaries as at 30 June 2017, their principal activities and countries of incorporation are shown in Note 53.

### NOTES TO THE FINANCIAL STATEMENTS FOR THE FINANCIAL YEAR ENDED 30 JUNE 2017 (CONTINUED)

### 23. INTANGIBLE ASSETS (CONTINUED)

### Goodwill

The goodwill in the Group's consolidated statements of financial position represents mainly the excess of the purchase consideration over the fair value of identifiable assets, liabilities and contingent liabilities recognised upon the Group's acquisition of New Britain Palm Oil Limited ("NBPOL") and its subsidiaries during the financial year ended 30 June 2015.

The Group carries out its annual impairment assessment on the goodwill arising from the acquisition of NBPOL, which for the purposes of impairment testing has been allocated to cash generating units ("CGU") within the Group, namely NBPOL CGU and PT Minamas Gemilang and its subsidiaries ("Minamas Group") as the Group believes that Minamas Group's operations will benefit from the additional synergies arising from the acquisition of NBPOL.

The impairment assessment is carried out on NBPOL CGU of USD367 million (equivalent to RM1,472.3 million as at 30 June 2016 and equivalent to RM1,575.7 million as at 30 June 2017) and Minamas Group CGU of USD150 million (equivalent to RM601.4 million as at 30 June 2016 and RM644.0 million as at 30 June 2017) in financial year ended 30 June 2016 and 30 June 2017 respectively.

The recoverable amounts of these two CGUs are based on their respective value-in-use calculations which are derived at using cash flows projection in which the following key assumptions are used:

| NBPOL CGU  | 30 June 2017  | 30 June 2016   |
|--|---|--|
| Projection period  | A 39-year cash flow<br>projection, based on the<br>average remaining lease<br>period of land in NBPOL | A 40-year cash flow projection,<br>based on the average remaining<br>lease period of land in NBPOL |
| FFB yields per hectare   | 24 - 32 mt/ha   | 24 - 32 mt/ha  |
| Selling prices of crude<br>palm oil ("CPO") per<br>metric ton ("mt") | USD710 - USD947 per mt  | USD660 - USD845 per mt   |
| Discount rates   | 8.4% per annum  | 9.7% per annum   |

### NOTES TO THE FINANCIAL STATEMENTS FOR THE FINANCIAL YEAR ENDED 30 JUNE 2017 (CONTINUED)

### 23. INTANGIBLE ASSETS (CONTINUED)

### Goodwill (continued)

The recoverable amounts of these two CGUs are based on their respective value-in-use calculations which are derived at using cash flows projection in which the following key assumptions are used (continued):

| Minamas Group CGU  | 30 June 2017           | 30 June 2016   |
|--|------------------------|--|
| Projection period  | based on the average   | A 48-year cash flow projection,<br>based on the average remaining<br>lease period of land in Indonesia |
| FFB yields per hectare   | 19 - 33 mt/ha          | 19 - 33 mt/ha  |
| Selling prices of crude palm oil ("CPO") per metric ton ("mt") | USD617 – USD718 per mt | USD704 – USD800 per mt   |
| Discount rates   | 9.5% per annum         | 10.0% per annum  |

The key assumptions used in the assessment are based on the Group's historical trends, actual past performances, forecast of macroeconomic conditions and internal assessments of the potential capabilities of the Group benchmarked against other industry comparables. The Group's impairment assessment of both CGUs outlined above included a sensitivity analysis on the key assumptions used. Based on the results of the sensitivity analysis, no reasonable change in the key assumptions used would result in an impairment charge during the financial years ended 30 June 2016 and 30 June 2017.

Management believes that no impairment charge is required on the goodwill as at 30 June 2016 and 30 June 2017 as the recoverable amount calculated based on value-in-use exceeded the carrying value of the goodwill of NBPOL and Minamas Group CGU by a significant margin.

The Company evaluates the recoverable amounts of the CGUs based on their value-in-use calculations using cash flow from financial budgets covering a five-year period and forecasted growth rates to extrapolate the cash flows in subsequent periods.

|                               |               |               | COMPANY       |
|-------------------------------|---------------|---------------|---------------|
|                               | 2017          | <u>2016</u>   | <u>2015</u>   |
| Discount rates (%)            | 8.2           | 8.9           | 8.9           |
| Forecast turnover growth (%)  | 4             | 5             | 2             |
| CPO selling price (RM per MT) | 2,550 - 2,700 | 2,430 - 2,650 | 2,260 - 2,400 |

Based on our assessment, no impairment charge is required on the goodwill as the recoverable amounts exceed the carrying value of the CGUs' assets and goodwill. The management believes that there is no reasonable possible change in any of the key assumptions used that would result in the carrying amount of the CGUs to materially exceed the recoverable amounts.

### NOTES TO THE FINANCIAL STATEMENTS FOR THE FINANCIAL YEAR ENDED 30 JUNE 2017 (CONTINUED)

### 23. INTANGIBLE ASSETS (CONTINUED)

### Smallholder relationships

The smallholder relationships arose from the acquisition of a controlling interest in a subsidiary. These assets reflect the relationship between Group and smallholders who cultivate and harvest fresh fruit bunches ("FFB") on land which is owned by the Group. The FFB is subsequently purchased by the Group for processing as palm oil. These assets are initially recognised at fair value and thereafter amortised over the remaining lease term of the Group's land of 45 years.

### Work-in-progress capitalised - agriculture development costs

Capitalised agriculture development costs comprise expenditure incurred relating to the development of oil palm genomic data and techniques, as well as clonal technology with the objective to increase yields and profit streams from the Group's plantation. Once the development enters into commercial production, the asset will be amortised over its estimated useful life.

During the financial year 30 June 2017, the Group had re-assessed the progress of the development projects and determined that distinct sections of the development project had been completed during the financial year hence commence amortisation on a straight-line basis over 5 to 20 years.

### Intellectual property rights

In the financial year ended 30 June 2015, the Company acquired intellectual property rights ("IP rights") on the genome base data from a third party, Synamatix Sdn Bhd for RM16.8 million. During the financial year 30 June 2017, the Group had performed an annual impairment assessment on the recoverable amount of the asset. The recoverable amount was determined based on the discounted cash flows from the use of the IP rights. The key assumptions adopted in the value-in-use computation are as follows:

|   |                        | GROUP/COMPANY   |
|---|------------------------|-----------------|
|   | <u>2016</u>            | 2015            |

Based on the value-in-use computation, no impairment charge is required on the intellectual property rights.

Subsequently, the Group had re-assessed the estimated useful life of the IP rights which resulted in a revision of the useful life from indefinite to finite life. As a result, the Group amortised the IP rights on a straight line basis, over a period of 20 years, commencing from 1 July 2016. The annual amortisation charge amounted to RM840,000.

### Acquired brand names

This mainly consists of fair value of brands in relation to the Group's beef, sugar and seed production operations which arose from the acquisition of NBPOL. The brands are initially recognised at fair value and thereafter amortised on a straight line basis over the estimated useful lives of 20 years.

In Indonesia, oil palm plantation owners/operators are required to participate in selected programs to develop plantations for smallholders (herein referred to as "plasma farmers"). The Group is involved in "Perusahaan Inti Rakyat Transmigrasi" and "Kredit Koperasi Primer untuk Anggotanya" ("KKPA") which requires the Group to serve as a contractor for developing the plantations, train and develop the skills of the plasma farmers, and purchase the fresh fruit bunches harvested by plasma farmers at the prevailing prices determined by the Indonesian Government.

The advances made by the Group in the form of plasma plantation development costs are recoverable from the plasma farmers upon the completion of the plasma plantation projects, either from the plasma farmers directly or through the assignment to plasma farmers of the loans obtained for the projects. Impairment losses are made when the estimated recoverable amounts are less than the outstanding advances.

On 23 July 2007, the Group disposed of its investment in Guthrie Corridor Expressway Sdn Bhd ("GCE") (now known as Prolintas Expressway Sdn Bhd). Following the disposal, the former advances from Kumpulan Jelei Sdn Bhd ("KJSB"), a subsidiary of SDP, to GCE were partially repaid in cash and the remaining outstanding balances were converted into non-transferable zero coupon Redeemable Loan Stocks ("RLS").

On inception, the RLS were discounted to its net present value based on the traffic projections of the GCE Expressway approved by the Directors covering the 33-year concession period ending 2036, at a discount rate of 7% per annum. The discount rate represents GCE's effective cost of borrowings.

Unless redeemed at an earlier date, either wholly or partially, at the fair value to be agreed by KJSB and GCE, the RLS shall be redeemed at 100% of its nominal value in cash as follows:

|             | Redemption date | RM'000  |
|-------------|-----------------|---------|
| 1st tranche | 1 July 2022     | 256,000 |

|             |                 | 500,000 |

On 20 June 2017, the Board of Directors of the Company approved the proposal to engage the issuer for an early redemption of the RLS at its carrying amount as at redemption date. The Group is in the midst of discussion with the issuer for the proposed early redemption of the RLS. The redemption is expected to occur within the next twelve months.

Receivables that are past due but not individually impaired relate to a number of independent customers for whom there is no recent history of default.

This amount was classified as current as the Group is now required to repay the outstanding balance within the next twelve months. The non-cash transactions as set out in Note 49(e) were entered during the financial year ended 30 June 2017 as a settlement against the amount due to this fellow subsidiary.

The Group and the Company have forward foreign exchange contracts in place with a notional value that are designated and effected as cash flow hedge. These contracts are expected to cover the Group's exposures ranging from one month to twelve months (30 June 2016: one month to twelve months, 30 June 2015: one month to twelve months, 1 July 2014: one month to twelve months) and the Company's exposures ranging from five months to six months (30 June 2016: one month to twelve months, 30 June 2015: one month to ten months, 1 July 2014: five months to seven months).

The interest rate swap contracts require settlement of net interest receivable or payable every 6 months. The settlement dates coincide with the dates on which interest is payable on the underlying debt and settlement occurs on a net basis.

- c. The maximum number of Sime Darby Shares to be allotted and issued under the PBESS shall not be more than in aggregate 10% of the issued and paid-up ordinary share capital of Sime Darby Berhad at any point in time during the duration of the PBESS.
- The PBESS shall be in force for a period of 10 years commencing from the effective date of implementation.
