The revenue for Q2 was higher than the preceding quarter mainly due to the overall improvement of global supply chain and logistic.

The utilities cost of the Group in this quarter under review increased by approximately 26% compared to the last preceding quarter largely due the various increases in electricity tariff since 1 February 2022 and increasing usage due to the increased operational/business requirements.

The finance cost of the Group in this quarter under review increased by approximately 42% compared to the last preceding quarter largely due the continuous increases in global interest rates and increasing usage of trade facilities.

The improved gross profit & profit before tax is due to the overall increase in revenue, and overall higher margin product mix as the Group continues to prioritize its focus to enlarge the IoT and semiconductor business segments.

#### B3. Prospects for the Group for the financial year ending 31 January 2023

The Group's future plans and strategies are as follows:

### (i) Expansion of semiconductor component manufacturing

As of 19 September 2022, the Group has a total of five (5) operational SMT lines completed with its automated robotic testing facilities.

We had ordered an additional one (1) SMT line using **IPO** proceeds to further ramp up the production capability for the semiconductor component manufacturing business. We expect the commissioning of this line in Q4 FYE2023

### (ii) Expansion of other SMT production facilities

The Group recently acquired and commissioned an additional new one (1) SMT line for shared-utilisation using **IPO** proceeds.

The Group for the financial year 2023, after the recovery from the Covid-19 pandemic and strengthening of USD/MYR exchange rates and no ongoing threats of natural disasters, the business challenges still remains dependent upon, challenges such as continuous interest rate hike, persistent US-China trade tension, global semiconductors components shortage, supply chain disruption, labour supply shortage, minimum wages hike, ongoing Ukraine-Russia conflict, higher utility prices, political instability, recessionary pressures and inflationary pressures. To manage and overcome these challenges, we have had to remain prudent and relentlessly enhance the Group's competitiveness in exploring new growth opportunities in such an unpredictable global economic climate. However, having secured an order book of approximately RM421 million on 19 September 2022 and by continuing its effort to continuously build on existing customer relationships, develop new customers, improve its production quality, efficiency, technical capability, and optimising capacity to better prepare the Group in facing these challenges. The Group also provides continuous staff development to align their skills and knowledge with the requirements of the latest technology in the automation and manufacturing industries. Barring any unforeseen circumstances in executing our existing order book, we are cautiously positive about the Group's performance for the financial year ending 31 January 2023.
