#### F. EXPLANATORY NOTES

(Amounts in RM million unless otherwise stated)

### 1) BASIS OF PREPARATION

These unaudited condensed interim financial statements of the Group have been prepared in accordance with Financial Reporting Standards ("FRS") 134 "Interim Financial Reporting", issued by Malaysian Accounting Standards Board ("MASB") and paragraph 9.22 and Appendix 9B of the Listing Requirements of Bursa Malaysia Securities Berhad, and should be read in conjunction with the Group's audited financial statements for the year ended 31 August 2011.

Within the context of these financial statements, the Group comprises the Company and its subsidiaries and the Group's interest in associates and jointly controlled entities as at 31 August 2011. The explanatory notes attached to the interim financial statements provide an explanation of events and transactions that are significant to an understanding of the changes in the financial position and performance of the group since the year ended 31 August 2011.

### 2) AUDIT QUALIFICATION

The annual audited financial statements for the financial year ended 31 August 2011 were not subject to any qualification.

#### 3) CHANGES IN ACCOUNTING POLICIES

The accounting policies applied are consistent with those adopted for the annual financial statements for the year ended 31 August 2011 except for the adoption of new standards, amendments to standards and IC interpretations that are mandatory for the Group with financial year beginning 1 September 2011.

## New standards, amendments to standards and IC interpretations that are applicable to the Group effective 1 September 2011

- Amendment to FRS 2 "Group Cash-settled Share-based Payment Transactions"
- Amendment to FRS 7 "Improving Disclosures about Financial Instruments"
- IC Interpretation 4 "Determining whether an arrangement contains a lease" ('IC 4')
- IC Interpretation 14 "FRS 119 The Limit on a Defined Benefit Asset, Minimum Funding Requirements"
- IC Interpretation 19 "Extinguishing Financial Liabilities with Equity Instruments"
- Improvements to FRSs (2010)

Except for IC 4, the adoption of the following IC Interpretation and amendments to FRSs and IC Interpretations that came into effect on 1 September 2011 did not have significant impact on the unaudited condensed consolidated financial statements upon their initial application.

## Adoption of new accounting policies and changes in accounting policies

The adoption of IC 4 requires the Group to identify any arrangement that does not take the legal form of a lease, but conveys a right to use an asset in return for a payment or series of payments. The interpretation provides guidance for determining whether such arrangements are, or contain, leases that should be accounted for in accordance with FRS 117 – Leases.

The Group has identified arrangements that contain leases and reported these arrangements in terms of FRS 117. The retrospective adoption of this interpretation resulted in the recognition of assets, corresponding finance lease liabilities, reallocation of non-controlling interest and restatement of lease changes, as detailed in Note 28.

#### 15) REVIEW OF PERFORMANCE

(a) Performance of the current year ended 31 May 2012 (3<sup>rd</sup> Quarter FY2012) against the corresponding year ended 31 May 2011 (3<sup>rd</sup> Quarter FY2011):

The Group recorded a 13.1% or RM2,944.9 million improvement in sales of electricity from RM22,460.2 million to RM25,405.1 million. This was mainly due to an increase in sales of electricity in Peninsular Malaysia and the tariff increase of 7.1% on 1 June 2011. The electricity demand grew by 4.2% in Peninsula and 4.5% in SESB as compared to the corresponding period last financial year.

Profit attributable to the owners of the Company for the period under review was RM3,189.7 million as compared to RM1,304.0 million in the corresponding period last year, an increase of RM1,885.7 million. The increase is mainly due to the alternate fuel cost differential compensation of RM2,823.8 million, which was recognised during the period.

## 15) REVIEW OF PERFORMANCE (CONT'D)

(b) Performance of the current third quarter (three months) FY2012 against the corresponding third quarter (three months) FY2011:

The quarter recorded a total sales of electricity of RM8,597.7 million against RM7,565.5 million for the same period last financial year. The improvement was mainly from sales of electricity in Peninsular Malaysia and SESB which recorded an increase of 12.5% and 22.0% respectively. This was mainly contributed by the increase in tariff in Peninsula of 7.1% and SESB of 14.7%. The units sold also registered a growth of 4.4% in the Peninsula and 3.7% in SESB as compared to the corresponding period.

The strengthening of Japanese Yen and the US Dollar against Ringgit Malaysia during the quarter under review resulted in a translation loss of RM533.1 million as compared to a gain of RM60.0 million in the corresponding quarter.

# 16) MATERIAL CHANGES IN THE QUARTERLY RESULTS COMPARED TO THE PRECEDING QUARTER

Performance of the current quarter (3<sup>rd</sup> Quarter FY2012) against the preceding quarter (2<sup>nd</sup> Quarter FY2012):

The Group reported a total sales of electricity of RM8,597.7 million for the current quarter, an increase of 3.2% as compared to the preceding quarter which reported sales of RM8,329.2 million. For the quarter under review the operating expenses were lower as compared to the preceding quarter mainly due to the alternate fuel cost differential compensation amounting to RM1,145.2 million consisting of RM367.4 million received during the second quarter and RM777.8 million accrued during the quarter under review.

The foreign translation loss of RM533.1 million as compared to RM628.4 million of gain in the preceding quarter is mainly due to the weakening Ringgit in Q3 FY2012, compared to the US Dollar and Japanese Yen.

The compensation received from the Government and PETRONAS for the alternate fuel cost differential compensation for FY2011 was recognised as other income. During the quarter under review, the compensation amount relating to the current financial year was recognised as part of the fuel cost.

### 17) PROSPECTS

The latest report by the Statistics Department reported that the Industrial Production Index (IPI) increased by 7.6% in May 2012 as compared with May 2011.

Given the projected steady GDP growth of 4.0% - 5.0% in 2012 and strong IPI recorded in May 2012, the projected electricity demand growth of 4.0% - 5.0% for financial year 2012 is achievable.

For financial year 2012, the Group is expected to record a better performance than last financial year mainly due to expected higher demand, implementation of fuel cost sharing mechanism and higher coal plant availability.

Given the foregoing scenario, the Board of Directors expects the Group's prospects for the year ending 31 August 2012 to improve compared to the last financial year.
