17. Prospects for Current Financial Year

The International Monetary Fund ("IMF") in their latest publication of World Economic Outlook(WEO) Update April 2021 projected that the global growth is projected at 6 percent in 2021, moderating to 4.4 percent in 2022. The projections for 2021 and 2022 are stronger than in the October 2020 WEO. The upward revision reflects additional fiscal support in a few large economies, the anticipated vaccine-powered recovery in the second half of 2021, and continued adaptation of economic activity to subdued mobility. High uncertainty surrounds this outlook, related to the path of the pandemic, the effectiveness

of policy support to provide a bridge to vaccine-powered normalization, and the evolution of financial conditions.

In view of the above, the Group will continue efforts to strengthen the cost control strategies and will also enhance its operation and marketing strategies in order to achieve higher production efficiency and to maximize profit margins.
