## 21. Commentary on prospect

#### Harvesting, sawmilling and kiln drying of timber

Internal logs extraction and mid-stream activities are expected to improve in the current quarters as the weather conditions have improved and close monitoring in the harvesting activities.

Operationally, harvesting activity will continue to face challenges such as reduction in annual coupe, ability to achieve optimum extraction yield per hectare, new regulations by the Forestry Department due to the stringent compliances, higher fuel cost, transport cost and other operational costs. Sawmilling and kiln drying segment will face challenges in the down turn in selling price and market volatility. However, with the continuous improvement initiatives undertaken by the management, the performance of the harvesting, sawmilling and kiln drying segment is expected to remain positive.

# Manufacturing

Price volatility and availability of raw materials will cause greater challenge to the Group. Competition remains very stiff especially in the local market as the customers demand price cutting and high quality products.

With the continuos supply for the current projects secured from the government and local projects, the segment is thus, expected to achieve marginal profit for the next quarter.

The Board will continue to intensify its effort to improve efficiency, productivity and profitability of the Group for the current financial year.

Barring any unforseen circumstances, the Board is optimistic that the operational performance of the Group in the financial year 2013 will continue to show improvement with better logging operations, increased efficiency in manufacturing and enhanced management processes.
