19. Events after the reporting period

There were no material events after reporting period during the current quarter.

20. Performance review

(a) Current Quarter vs Corresponding Quarter of Previous Period (2Q15 vs 2Q14)

The Group's revenue for the quarter under review was RM19.82 million, decreased by 8% from RM21.53 million reported in the previous year's corresponding quarter. As a result, the Group recorded a marginal loss before taxation of RM0.06 million as compared to a profit before taxation of RM0.16 million in the previous year's corresponding quarter. This situation was contributed by unfavorable performance of both harvesting and manufacturing division of the Group.

Harvesting, sawmilling and kiln drying segment

For the quarter ended 30 June 2015, the harvesting, sawmilling and kiln drying segment reported a decrease in loss before taxation to RM0.56 million as compared to RM0.9 million in the previous year's corresponding quarter. The harvesting performance was severely affected in 2015 after the state forestry department reduced the harvesting quota (annual allowable cut) from 2,600 hectare to 1,500 hectare in 2015. However, the reduction was only temporary and the quota will be returned to 2,600 hectare in 2016 onwards.

As a result, the logs production has reduced by 31% in the quarter under review as compared to the same quarter in the previous year. However the impact to the reduction in sawmilling and kiln drying revenue was only 2% due to better selling price of sawn timber recorded in the current quarter.

Manufacturing segment

During the quarter under review, the manufacturing segment which is the glass division of the Group recorded a profit before taxation of RM0.33 million, a decrease of 34% from RM0.50 million recorded in the previous year's corresponding quarter. The decrease in profit was mainly contributed by the decrease in the segment's revenue of 15% during the quarter under review. It is reported that the slowdown in the construction industry especially in housing sector in the medium and high end houses has impacted the Group's glass division.

Other segment

Other segment for the Group has recorded a decrease of 21% in loss before taxation from RM1.24 million to RM0.99 million in the current guarter as a result of savings in the segment's finance cost.

(b) Current Period-to-date vs Previous Period-to-date (FY2015 vs FY2014)

The Group's performance for the period ended 30 June 2015 was unfavorable as compared to previous year's corresponding period, where the Group recorded a loss before taxation of RM2.52 million in the current period. The Group's revenue also decreased significantly from RM67.86 million to RM35.23 million in the current period. The adverse performance of the Group was mainly contributed by the harvesting, sawmilling and kiln drying segment.

Harvesting, sawmilling and kiln drying segment

The segment reported a loss before taxation of RM0.82 million, a substantial decrease of 59% from the previous year's corresponding period. Similarly, the segment's operating revenue has reduced significantly to RM21.32 million in the current period from RM52.02 million reported in the preceding year's corresponding period. In the preceding year's corresponding period, the segment recorded logs sales proceed amounting to RM27.29 million from the concession of the Group's timber management subsidiary which had been allocated for mining purposes. There was no such income registered in the current period under review.

Other operating income for the segment has reduced considerably in the period under review, from RM0.94 million to RM0.32 million, mainly as a result of no income on post-felling forest inventory development and fire insurance claim recorded in the current period. The lower expenses for the segment in the current period were in line with the reduction in logs harvesting and sawn timber production.

Manufacturing segment

During the period under review, the manufacturing segment recorded a profit before taxation of RM0.45 million, representing a decrease of 54% from RM0.98 million reported in the previous year's corresponding period. The decrease in profit before taxation was in line with the decrease in the segment's revenue of 11% in the period under review. The adverse performance in manufacturing segment related to the glass division performance of the Group, as a result of the slowdown in the demand for the local projects on medium and high end residential buildings.

Other segment

Other segment for the Group has recorded a decrease of 5% in loss before taxation from RM2.26 million to RM2.15 million in the current period mainly as a result of savings in the segment's finance cost.

21. Material change in performance of operating segments of current quarter compared with immediate preceding quarter (continued)

The Group's result improved in the current quarter with a loss before taxation reduced tremendously to RM0.06 million from RM2.46 million in the immediate preceding quarter, whilst the revenue improved by 29% in the current quarter.

The major contribution for the improvement was from the harvesting, sawmilling and kiln drying segment as the result improved from the loss of RM1.46 million in the First Quarter of 2015 to the profit of RM0.59 million in the Second Quarter of 2015. The main reason was the improvement in production as the current segment's operations were not affected by the unfavourable weather condition.

Similarly, the manufacturing segment's profit before tax improved 188% to RM0.33 million in the current quarter as compared to RM0.12 million in the immediate preceding quarter. In contrast, the segment's revenue slightly decreased from RM6.96 million in the First Quarter of 2015 to RM6.94 million in the Second Quarter of 2015. The reverse situation for the profit and revenue for the segment was contributed by the savings in expenses of 5%.

The loss before taxation for other segment in the current quarter decreased by 12% as compared to RM1.12 million reported in the immediate preceding quarter. The reduction in loss in the quarter under review was contributed by the savings in certain administrative expenses.

22. Commentary on prospect

Harvesting, sawmilling and kiln drying of timber

Internal logs extraction and mid-stream activities are expected to improve in the coming quarters as the weather conditions improve. However, harvesting activity will continue to face challenges such as ability to achieve optimum extraction yield per hectare, new regulations by the Forestry Department due to the stringent compliances, higher fuel cost, transportation cost and other operational costs.

In addition, the reduction in harvesting quota imposed by the state forestry department in 2015 will continuously affect the segment's performance in the remaining quarter of 2015. However, with the special exercise and initiatives undertaken this year, it is expected that segment will project positive result in the Third Quarter 2015.

Manufacturing

Price volatility and availability of raw materials will cause greater challenge to the Group. Competition remains very stiff especially in the local market as the customers demand price reduction and high quality products.

With the improved glass production line and stable demands, the segment is thus, expected to achieve marginal profit for the next quarter.

The Board will continue to intensify its effort to improve efficiency, productivity and profitability of the Group for the current financial year.
