#### (a) Methods and assumptions used to estimate fair value

The fair values of financial assets and financial liabilities are determined as follows:

i. Financial instruments that are not carried at fair value and whose carrying amounts are a reasonable approximation of the fair value.

The carrying amounts of financial assets and liabilities, such as trade and other receivables, trade and other payables and borrowings, are reasonable approximation of fair value due to their short-term nature.

#### ii. Derivatives

The fair value of a forward foreign exchange contract is the amount that would be payable or receivable upon termination of the outstanding position arising and is determined by reference to the difference between the contracted rate and the forward exchange rate as at the end of the reporting period applied to a contract of similar amount and maturity profile.

#### iii. Quoted investments

The fair value of quoted investments in Malaysia is determined by reference to the exchange quoted market bid prices at the close of the business on the end of the reporting period.

#### A15 Financial instruments (Cont'd)

#### (b) Fair value hierarchy

Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

#### Derivatives

The fair value of forward exchange contracts is estimated by discounting the difference between the contractual forward price and the current forward price of the residual maturity of the contract using a risk-free interest rate (based on Government bonds).

Level 3 fair value measurements are those derived from inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The following tables set-out the financial instruments carried at fair value is disclosed, together with their fair values and carrying amounts showed in the statement of financial position.

#### **B1** Operating segments review

#### a) Current quarter vs. Previous year corresponding quarter

The Group recorded revenue of RM98.2 million for the quarter ended 31.12.2022 ("4Q 2022"), which contracted by RM51.6 million (-34%) as compared with revenue of RM149.8 million recorded in the previous year quarter ended 31.12.2021 ("4Q 2021"). The weaker revenue trend was attributed to lower contribution from both the manufacturing and trading segments.

The Group recorded a loss before tax of RM9.3 million for 4Q 2022 as compared with a profit before tax of RM31.6 million recorded in 4Q 2021. This was mainly due to declining average selling prices, higher inventories cost and input costs denting profitability.

The performance of the respective operating business segments of the Group for 4Q 2022 as compared with 4Q 2021 are analysed as follows:

#### Manufacturing

The manufacturing operations' revenue declined by 45% to RM27.8 million in 4Q 2022, from RM50.3 million recorded in 4Q 2021. This was attributed to the slowdown in market demand coupled with weaker average selling prices.

#### **Trading**

The trading operations' revenue reduced by 29% to RM70.4 million in 4Q 2022 as compared with RM99.5 million recorded in 4Q 2021. The weaker performance was mainly due to lower sales volume and weaker average selling prices.

#### b) Current year-to-date vs. Previous year-to-date

For the financial year ended 31.12.2022 ("FY 2022"), the Group recorded revenue of RM493.1 million, which declined by 3% as compared with revenue of RM507.9 million recorded in the previous financial year ended 31.12.2021 ("FY 2021"). The weaker performance was mainly weighed down by the manufacturing segment.

In line with the weaker revenue trend, the Group's profit before tax deteriorated sharply to RM11.7 million for FY 2022 as compared with RM136.5 million recorded in FY 2021, pressured further by higher inventories cost as well as the write down of inventories amounting to RM12.6 million and fair valuation losses on trade forward contracts totaling RM1.0 million.

The performance of the respective operating business segments of the Group for FY 2022 as compared with FY 2021 are analysed as follows:

#### Manufacturing

The manufacturing operations recorded revenue of RM161.2 million for FY 2022, which fell by 17% as compared with RM194.1 million recorded in FY 2021. The weaker performance was attributed to lower sales volume on the back of weaker market demand and lackluster average selling prices.

#### B1 Operating segments review (Cont'd)

#### b) Current year-to-date vs. Previous year-to-date (Cont'd)

#### **Trading**

The trading operations recorded revenue of RM331.9 million for FY 2022, which grew by 6% as compared with RM313.8 million recorded in FY 2021. The stronger performance was mainly supported by higher market demand and the pickup in average selling prices.

#### B2 Comparison with preceding quarter's results

The Group's revenue for 4Q 2022 eased to RM98.2 million as compared with RM116.4 million achieved in 3Q 2022 due to lower sales volume and weaker average selling prices.

In tandem with the weaker revenue trend and compresses margins, the Group recorded a loss before tax of RM9.3 million for 4Q 2022 as compared with a loss before tax of RM17.1 million for 3Q 2022.

#### B3 Current year prospects and progress on previously announced revenue or profit forecast

#### a) Prospects for 2023

With the start of the new year 2023, lacklustre international steel prices of the past year have been firming up, mainly attributed to the relaxation of China's Covid-19 lockdown policies and softening of US monetary policies. However, international steel demand remains rather weak reflecting the repercussions of inflationary pressures, raising interest rates globally and ongoing geopolitical tensions.

On the domestic front, steel demand and average selling prices have yet to pick up much on the back of the Chinese New Year festivities while pending news for existing/new infrastructure projects to roll out. The external environment's uncertainties remain a downside risk for Malaysia's open economy. Apart from major infrastructure projects roll out, steel demand growth also hinges on healthy private consumption and construction activities which will very much depend on the new Government's economic policies and direction.

The Group remains vigilant of the challenges and volatility in steel prices, where we will continue to focus on prudent procurement strategies and inventory management, improving operational efficiency as well as optimising costs to mitigate any adverse impact on our financial performance.

Income tax is calculated at the Malaysian statutory tax rate of 24% of the estimated taxable profits for the year. The effective tax rate of the Group for the current quarter ended 31 December 2022 was lower than the statutory tax rate, mainly due to the business loss position and corresponding reversal of tax overprovided for. The effective tax rate of the Group for the financial year ended 30 December 2022 was higher than the statutory tax rate, mainly due to the effect of expenses non-deductible for tax purposes.
