UNAUDITED INTERIM FINANCIAL STATEMENTS FOR THE FIRST QUARTER ENDED 31 MARCH 2010

(b) FRS 8: Operating Segments

Prior to the adoption of FRS 8, the Group's segment reporting was based on a reporting format of business segments. FRS 8 requires segment information to be presented on a similar basis to that used for internal reporting purposes. As a result, Group's segmental reporting had been presented based on the internal reporting to the chief operating decision maker who makes decision on the allocation of resources and assesses the performance of the reportable segments. The comparatives of the preceding year corresponding period are represented to conform to the current presentation as disclosed in Note A9.

(c) FRS 101: Presentation of Financial Statements (revised)

The revised FRS 101 separates owner and non-owner changes in equity. The statement of changes in equity includes only details of transaction with owners, with all non-owner changes in equity presented in the statement of comprehensive income. In addition, the standard introduces the statement of comprehensive income which presents income and expense recognised in the period. This statement may be presented in one single statement, or two linked statements. In addition, a statement of financial position is required at the beginning of the earliest comparative period following a change in accounting policy, the correction of an error or the reclassification of items in the financial statements. This revised FRS does not have any impact on the financial position and results of the Group and the Company.

(d) FRS 139: Financial Instruments – Recognition and Measurement

FRS 139 set out the new requirements for the recognition and measurement of the Group's financial instruments. Financial instruments are recorded initially at fair value. Subsequent measurement of the financial instruments at the balance sheet date reflects the designation of the financial instruments. The Group determines the classification at initial recognition and for the purpose of the adoption of the standard, as at transitional date on 1 January 2010.

Financial assets

(i) Investment in quoted shares

Prior to 1 January 2010, the Group classified its investments in quoted equity instruments as other investment under non-current assets. Such investments were carried at the lower of cost and market value, determined on an aggregate basis. Upon the adoption of FRS 139, these investments at 1 January 2010 are reclassified under available-for-sale. These equity instruments are not held for trading and reflected in the statement of financial position under non-current assets, current assets and are stated at their fair values.

(ii) Trade and other receivables

Prior to 1 January 2010, provision for doubtful debts was recognised when it was considered uncollectible. Upon the adoption of FRS 139, an impairment loss is recognised when there is objective evidence that an impairment loss has been incurred. The amount of the loss is measured as the difference between the receivable's carrying amount and the present value of the estimated future cash flows discounted at the receivable's original effective interest rate. As at 1 January 2010, the Group has remeasured the allowance for impairment losses as at that date in accordance with FRS 139 and the difference is recognised as adjustments to the opening balance of retained earnings as at that date.
