B13 EARNINGS PER SHARE (CONTINUED)

(b) Diluted

For diluted earnings per share calculation, the weighted average number of ordinary shares in issue is adjusted to assume conversion of all dilutive potential ordinary shares. The dilutive potential ordinary shares for the Group are share options granted to employees.

For the share options granted to employees, a calculation is done to determine the number of shares that could have been acquired at fair value (determined as the average share price of the Company's shares) based on the monetary value of the subscription rights attached to the outstanding share options. The difference is added to the denominator as an issue of ordinary shares for no consideration. This calculation serves to determine the 'bonus' element in the ordinary shares outstanding for the purpose of computing the dilution. No adjustment is made to the net profit attributable to the shareholders for the share options calculation.

In respect of period ending 30 September 2009, KPJ has no outstanding share options as ESOS has expired on 24 August 2009.
