B3 CURRENT YEAR PROSPECTS

In the year 2014, it was evidenced that the demand for healthcare services had increased in line with the population growth, better life expectancy, rapid ageing and the rising of middle income group. It is anticipated that this rising trend will continue to escalate in the year 2015.

In line with the continuous demand, expansion of existing hospitals and building of new hospitals will remain to be the Group's core strategies, as this will enhance the capacity and improve the service delivery for our patients. The Group envisage that the new starts up hospitals will contribute towards the revenue growth in 2015 along with the other existing hospitals.

However, most new greenfield hospitals have an average gestation period between three to five years, therefore it is anticipated that this will moderate the Group's results and performance.

(b) Diluted

For the diluted earnings per share calculation, the average number of ordinary shares in issue is adjusted to assume conversion of all dilutive potential ordinary shares. The dilutive potential ordinary shares for the Group are the warrants issued.

For the share warrants issued, a calculation is done to determine the number of shares that could have been acquired at fair value (determined as the average share price of the Company's shares) based on the monetary value of the subscription rights attached to the outstanding warrants. The number of shares calculated as above is compared with the number of shares that would have been issued assuming the exercise of the warrants. The difference is added to the denominator as an issue of ordinary shares for no consideration. This calculation serves to determine the 'bonus' element in the ordinary shares outstanding for the purpose of computing the dilution. No adjustment is made to profit for the financial period for the warrants calculation.
