The adoption of the above MFRSs, Amendments to MFRSs and IC Interpretation stated above are not expected to result in significant financial impact to the Group, except as disclosed below:

- MFRS 9: Financial Instruments

MFRS 9 (IFRS 9 issued by IASB in July 2014) replaces earlier versions of MFRS 9 and introduces a package of improvements which includes a classification and measurement model, a single forward looking 'expected loss' impairment model and a substantially-reformed approach to hedge accounting. MFRS 9 when effective will replace MFRS 139.

The initial application of MFRS 9 in the future may have an impact on the financial statements of the Group. However, it is not practicable to provide a reasonable estimate of the effect until a detailed review has been completed.

A2. MFRSs, Amendments to MFRSs and IC Interpretation yet to be effective (Cont'd.)

- MFRS 15: Revenue from Contracts with Customers

Under MFRS 15, an entity recognises revenue when a performance obligation is satisfied, which is when the 'control' of the goods and services underlying the particular performance obligation is transferred to the customers.

The Group is currently assessing the financial impact of adopting MFRS 15.

- MFRS 16: Leases

MFRS 16 replaces the existing standard on leases, MFRS 117.

MFRS 16 eliminates the current dual accounting model for lessees, which distinguishes between on-balance sheet finance leases and off-balance sheet operating leases. Under MFRS 16, lessees are required to recognise all leases in their balance sheets in the form of an asset (for the right of use) and a lease liability (for the payment obligation). Exception is granted for leases which are for a term of 12 months or less or where the underlying lease assets are of low value. For such leases, lessees may elect to expense off the lease payments on a straight line basis over the lease term or using another systematic method.

MFRS 16 has substantially retained the lessor accounting model in MFRS 117. A lessor still has to classify leases as either finance or operating leases, depending on whether substantially all of the risks and rewards incidental to ownership of the underlying asset have been transferred to the lessee.

The Group is currently assessing the financial impact of adopting MFRS 16.

The principal activity of MA is business and domestic software development and information technology consultancy activities.

B. Additional Notes Pursuant To The Main Market Listing Requirements of Bursa Malaysia For The Three Months Ended 31 December 2016

B1. Review of Results

Current Quarter/Year to Date

Group revenue was RM85,101,000 compared to RM97,071,000 in the corresponding quarter of the last financial year. Profit before tax of RM19,688,000 was reported compared to pre-tax loss of RM1,460,000 in the corresponding quarter of the last financial year.

Insurance segment – Revenue decreased by RM10,805,000 to RM82,036,000 for the current quarter compared to the corresponding quarter of the last financial year. The decrease in revenue was primarily due to lower gross earned premium. Profit before tax of RM16,593,000 was reported as compared to pre-tax profit of RM12,292,000 in the corresponding quarter of the last financial year. This was largely attributable to the increase in investment income arising from the insurance subsidiary company's share of Malaysian Motor Insurance Pool's investment income and a write back of impairment of RM2,291,000 in respect of its investment in Malaysian International Tuna Port Sdn. Bhd. which was previously impaired.

Information technology (IT) segment - Revenue from external parties decreased by RM515,000 to RM2,332,000 for the current quarter compared to the corresponding quarter of the last financial year, principally due to lower consulting services. A lower pre-tax loss of RM2,471,000 was reported for the current quarter as compared to pre-tax loss of RM5,058,000 in the corresponding quarter of the last financial year, largely due to unrealised foreign exchange gain of RM2,014,000 reported in the current quarter as compared to unrealised foreign exchange loss of RM941,000 in the corresponding quarter of the last financial year.

B2. Comparison With Immediate Preceding Quarter's Results

Group revenue was RM85,101,000 compared to RM86,388,000 reported in the immediate preceding quarter. Profit before tax of RM19,688,000 was reported compared to pre-tax profit of RM12,870,000 in the immediate preceding quarter.

Insurance segment – Revenue decreased by RM453,000 to RM82,036,000 for the current quarter compared to the immediate preceding quarter. This was mainly attributable to lower gross earned premium. Profit before tax of RM16,593,000 was reported compared to pre-tax profit of RM22,008,000 in the immediate preceding quarter. This was largely attributable to lower underwriting results arising from the absence of profit commission earned from reinsurance business for the current quarter. Under the terms of the reinsurance arrangement, profit commission is determined and recognised as income in the last quarter of each financial year.

IT segment – Revenue from external parties decreased by RM114,000 to RM2,332,000 for the current quarter compared to the immediate preceding quarter. This was mainly attributable to lower sales of hardware. However, pre-tax loss of RM2,471,000 was reported for the current quarter as compared to a marginal pre-tax loss of RM2,477,000 reported in the immediate preceding quarter, largely due to unrealised foreign exchange gain reported in the current quarter.

B3. Current Year Prospects

The insurance sector continues to be challenging with intense competition amongst the local players. This is further compounded by the weak local consumer sentiment stemming from higher cost of living that has reduced the spending power of consumers. Nevertheless, with the Group's emphasis on profitable business, the Board expects the performance of the insurance segment for the financial year ending 30 September 2017 to be satisfactory.

The IT segment also remains extremely competitive. With the Group's focus on maintaining high quality service to its clients and the relationship established with its long term clients, the IT segment is expected to remain stable in its long term growth.

In spite of the challenges faced by the Group and barring unforeseen circumstances, the Board expects the Group's performance for the financial year ending 30 September 2017 to be satisfactory.

B4. Profit Forecast and Profit Guarantee

No forecast has been issued by the Group for the period ended 31 December 2016.
