Loss before tax	(34,874)	(10,922)	219.30

12 REVIEW OF PERFORMANCE (CONTINUED)

Lower revenue in the first quarter of 2020 ("1Q2020") as compared to the corresponding quarter of 2019 ("1Q2019") was mainly due to lower sales tonnage for both domestic and export markets as well as lower selling price of various steel products. This was also partly attributable to temporary business closures and global supply chain disruptions arising from the MCO domestically and lockdowns/disruptions across the world resulted from the Covid-19 pandemic.

Higher loss before tax in 1Q2020 as compared to 1Q2019 was mainly attributable to:-

- (i) Reasons as explained above,
- (ii) Allowance of inventories written down of RM7.43 million, and
- (iii) Overhead cost for plant temporary shutdown of RM5.21 million due to plant stoppage during the MCO period.

- (ii) Other income arising from the reversal of accrual no longer required of RM37.99 million in 4Q2019, and

15 PROSPECTS

The Covid-19 pandemic is expected to remain as a cause to major disruptions to the global supply chains and dampen economic activity domestically and across the world.

The steel industry will be continuously affected by production stoppages, disrupted supply chains, and a sharp decline in steel demand in the second quarter of the year. Steel consumption is expected to improve gradually in the second half of the year in conjunction with the opening up of both domestic and overseas economies. However, the magnitude of this recovery remains uncertain.

Domestic steel demand continues to be affected by a low resumption rate of construction activity. The pace of recovery in steel demand will depend heavily on the Government's spending on infrastructure projects, which will have a significant multiplier effect on the country's economy.

To mitigate the impact of weak domestic demand, the Group is strengthening its strategy on the export markets, particularly China, where demand is boosted by fast-track infrastructure investments. This will be more visible in the second half of 2020 as China's planned new local government special bonds of RMB3.75 trillion are expected to further support its infrastructure development. However, construction activities in China are expected to be partly affected by seasonal weather conditions as the monsoon season in southern China and East Asia is typically from June till August.

Given the uncertain market conditions, the Group will continue its focus on cash flow management and cost down programs to remain resilient and responsive to market changes. The Group will readjust to appropriate strategy depending on future market direction both domestically and internationally.
