a) FRS 101 (Revised): Presentation of Financial Statements

The revised FRS 101 separates owner and non-owner changes in equity. Therefore, the condensed consolidated statement of changes in equity will now include only details of transactions with owners. All non-owner changes in equity are presented as a single line labelled as total comprehensive income.

The Standards also introduces the statement of comprehensive income: presenting all items of income and expense recognised in the income statement, together with all other items of recognised income and expense, either in one single statement, or in two linked statements. The Group has selected to present in one single statement.

This revised FRS does not have any impact on the financial position and results of the Group.

b) Amendment to FRS 117: Leases

Leasehold land is classified as a finance lease if the Group has substantially all the risks and rewards incidental to ownership. Previously, leasehold land was classified as an operating lease unless title is expected to pass to the lessee at the end of the lease term. Following the amendment to FRS 117, the Group has reclassified its leasehold lands to property, plant and equipment. This change in classification has no effect on the results of the Group. The reclassification has been accounted for retrospectively in accordance with the transitional provision and certain comparative balances have been restated as follows:

Consolidated Balance Sheet As At 30 June 2010	As previously stated RM '000	Effects of adoption of FRS 117 RM '000	As restated RM '000
Property, plant and equipment	545,004	343,497	888,501
Prepaid land lease payments	343,497	(343,497)	-

c) FRS 139: Financial Instruments: Recognition and Measurement

FRS 139 sets out the new requirements for the recognition and measurement of the Group's financial instruments. Financial Instruments are recorded initially at fair value. Subsequent measurement of the financial instruments at the balance sheet date reflects the designation of the financial instruments. The Group determines the classification at the initial recognition and for the purpose of the first adoption of the standard, as at transitional date on 1 July 2010.

Financial Assets

Financial assets are classified as either financial assets at fair value through profit or loss, loans and receivables or held-to-maturity investments.

The Group financial assets include cash and short-term deposits, financial assets at fair value through profit or loss, loans and receivables and available-for-sale. Financial assets are initially measured at fair value. The fair value is normally the transaction price or market price, plus transaction costs directly attributable to the acquisition of the financial assets.

Financial Assets at Fair Value through Profit or Loss

Financial assets classified as held-for-trading are categorised as finance assets at fair value through profit or loss. Financial assets are held-for-trading if they are acquired for the purpose of selling in the near term. The carrying amount is marked to market with the difference taken to income statement.

Loans and Receivables

Prior to 1 January 2010, loans and receivables were stated at gross receivables less provision for doubtful debts. Under FRS 139, loans and receivables are initially measured at fair value and subsequently amortised cost using the effective interest rate (EIR) method. Gains and losses are recognised in income statement as a result of the amortisation process and when the loans and receivables are derecognised or impaired.

Financial Assets Held-to-Maturity

Non-derivative financial assets with fixed or determinable payments and fixed maturity are classified as held-to-maturity, when the Group has the expressed intention and ability to hold to maturity.

Investments which are intended to be held-to-maturity are subsequently measured at amortised cost using the EIR method. Amortised cost is calculated by taking into account any discount or premium on acquisition, over the period to maturity. For investments carried at amortised cost, gains and losses are recognised in income statement as a result of the amortisation process, and when the investment are derecognised or impaired.

Financial Liabilities

Financial liabilities are classified as either financial liabilities at fair value through profit or loss or other financial liabilities at amortised cost using the EIR method. Financial liabilities at fair value are held-for-trading if the financial liabilities are incurred with the intention of repurchasing them in the near term.

The Group's financial liabilities include trade and other payables and, loans and borrowings.

Derecognition of Financial Liabilities

Financial liabilities are derecognised when the obligation under the liability is discharged, cancelled or expired.

Policy on Impairment Loss

The Group assess whether there is any objective evidence that a financial asset is impaired at each reporting date. Receivables that are assessed not to be impaired individually are subsequently assessed for impairment on a collective basis based on the Group's past experience. If in a subsequent period, the carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years.
