INTERIM FINANCIAL REPORT

PART A – EXPLANATORY NOTES PURSUANT TO FRS 134

The interim financial report should be read in conjunction with the audited annual financial statements of the Group for the year ended 30 June 2010.

A1. Accounting Policies and Methods of Computation

The interim financial report is unaudited and has been prepared in accordance with Financial Reporting Standard ('FRS') 134: "Interim Financial Reporting" and Chapter 9, part K of the Main Market Listing Requirements of the Bursa Malaysia Securities Berhad ('Bursa Securities').

The explanatory notes contained herein provide an explanation of the events and transactions that are significant to the understanding of the changes in the financial position and performance of the Group since the financial year ended 30 June 2010.

The accounting policies and methods of computation adopted by the Group in the interim financial statements are consistent with those adopted in the latest audited annual financial statements except for the adoption of new and revised FRSs, amendments to FRSs and Interpretation Committee ('IC') interpretations which were effective for financial period beginning 1 July 2010.

The adoption of the new and revised FRSs, amendments to FRSs and ICs do not have significant financial impact on the Group other than the effects of the following FRSs:

<u>FRS 101(revised): Presentation of Financial Statements</u>

The revised FRS 101 requires all non-owner changes in equity to be presented either in a single statement of comprehensive income or in two statements which comprise a separate income statement and statement of comprehensive income. The Group has elected to present the statement of comprehensive income in two statements if there is any comprehensive income being recognized in the period.

There is no impact on the financial position of the Group since these changes affect only the presentation of items of income and expenses. The Group has adopted the standard retrospectively.

<u>FRS 7 Financial Instruments: Disclosures</u>

FRS 7 requires extensive disclosure of qualitative and quantitative information about exposure to risks arising from financial instruments. Such information will be disclosed in the audited annual financial statements of the Group.

<u>Amendment to FRS 117 Leases</u>

With the adoption of the Amendment to FRS 117, the classification of a leasehold land as a finance lease or an operating lease is based on the extent to which risks and rewards incidental to ownership lies. Accordingly, the Group has reclassified its leasehold land to property, plant and equipment. This change in classification has no effect on the financial position of the Group. The reclassification has been accounted for retrospectively in accordance with the transitional provision and comparative balances have been restated.

FRS 139 Financial Instruments: Recognition and Measurement

FRS 139 sets out the new requirements for the recognition and measurement of the Group's financial instruments. It also sets out the requirements for the application of hedge accounting.

Financial instruments are recorded initially at fair value. Subsequent measurement of those instruments at end of each reporting period reflects the designation of the financial instrument. The Group determines the classification at initial recognition and re-evaluates this designation at each year end except for those financial instruments measured at fair value through profit or loss.

Financial Assets

a) Loans and Receivables

Prior to 1 July 2010, loans and receivables were stated at gross proceeds receivables less allowance for doubtful debts. Under FRS 139, loans and receivables are initially measured at fair value and subsequently at amortised cost using the effective interest rate method. Gains and losses are recognised in the consolidated income statement when the loans and receivables are derecognised, impaired or through the amortisation process.

b) Available-for-sale

Prior to 1 July 2010, available-for-sale financial assets such as other investments were accounted for at cost less impairment losses. Under FRS 139, available-for-sale financial asset is measured (a) at fair value initially and subsequently with unrealized gains or losses recognised directly in equity until the investment is derecognised or impaired or (b) at cost if the unquoted equity instrument is not carried at fair value because its fair value cannot be reliably measured.

c) Held-to-maturity

Prior to 1 July 2010, held-to-maturity financial assets such as negotiable instruments of deposits were accounted for at cost less impairment losses. Under FRS 139, held-to-maturity financial asset is initially measured at fair value and subsequently at amortised cost using the effective interest rate method. Gains and losses are recognised in the consolidated income statement when the investments are derecognised, impaired or through the amortisation process.

Financial Liabilities

a) Borrowings

Prior to 1 July 2010, borrowings were stated at the proceeds received less directly attributable transaction costs. Under FRS 139, borrowings are initially measured at fair value plus directly attributable transaction costs and subsequently at amortised cost using the effective interest rate method. Gains and losses are recognised in the consolidated income statement when the liabilities are derecognised or through the amortisation process.

b) Derivative Financial Instruments

Prior to 1 July 2010, derivatives were not recognised in the financial statements. Under FRS 139, derivatives are required to be initially recognised at fair value on the date the derivative contract is entered into and subsequently at fair value at each of the reporting period. Derivatives are carried as assets when fair value is positive and as liabilities when fair value is negative. Any gains or losses arising from changes in fair value on derivatives that do not qualify for hedge accounting are recognised in the income statement.

However, where derivatives qualify for hedge accounting, recognition of any changes in fair value will depend on the nature of items being hedged as explained below:

Cash flow hedge

The effective portion of the gain or loss on the hedging instrument is recognised directly in equity, while an ineffective portion is recognised immediately in the income statement. Amounts taken to equity are transferred to the income statement when the hedged transaction affects profit or loss, such as when the hedged financial expense is recognised or when a forecast sale occurs. When the hedged item is the cost of a non-financial asset or non-financial liability, the amounts taken to equity are transferred to the initial carrying amount of non-financial asset or liability.

If the forecast transaction or firm commitment is no longer expected to occur, amounts previously recognised in equity are transferred to the income statement. If the hedging instrument expires or is sold, terminated or exercised without replacement or rollover, or if its designation as a hedge is revoked, amounts previously recognised in equity remain in equity until the forecast transaction or firm commitment occurs.

In accordance with the transitional provisions of FRS 139, the above changes are applied prospectively and the comparatives as at 30 June 2010 are not restated. Instead, the changes have been accounted for by restating the following opening balances in the statement of financial position as at 1 July 2010.
