Additional information required by the BMSB's Listing Requirements

1 Review of performance

The revenue recorded in Q2 2010 decreased by 23% to RM24.725 million as compared to Q2 2009. Correspondingly, the profit before tax dropped by 12% to RM1.755 million.

This was mainly due to the completion in construction of existing projects. The successfully launched new projects had yet to commence construction for any profit recognition at this stage.

2 Variance of results against preceding quarter

The Group's turnover for the current quarter increased by 3% to RM24.725 million as compared to RM24.346 million recorded in the preceding quarter. Correspondingly, profit before tax increased by 104% to RM1.755 million. As noted above, this was due to the successful take-up rates of new product types and launches.

3 Current year / future prospects

The economic downturn seems to have bottomed out currently, as indicated by increased demand and more buoyant levels of confidence. The low interest regime and the government's removal of the foreign buying restrictions also bode well for the property market. The predictability and stability of material prices is another positive point. As the Group has a number of diverse projects – ranging from mass market townships to higher end properties, it is well positioned to take advantage of the opportunities in the market.

4 Profit forecast

This is not applicable as no profit forecast was published.
