The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction

The Group does not expect any significant financial impact on the consolidated financial statements arising from the adoption of the above FRSs and Interpretation except of the following: -

FRS 101: Presentation of Financial Statements

This standard sets the overall requirements for the presentation of financial statements, guidelines for their structure and the minimum requirements for their content. The standard separates owner and non-owner changes in equity, whereby the statement of changes in equity will include only details of transactions with owners, and all non-owner changes in equity are presented separately. In addition, the standard introduces the statement of comprehensive income, which presents income and expense items recognised in profit and loss, together with all other items of recognised income and expense, either in one single statement, or in two linked statements. The application of this standard does not have any impact on the financial results of the Group, as the changes introduced are presentational in nature.

FRS 117: Leases

The Group has reassessed and reclassified the leasehold land which is in substance finance lease to property, plant and equipment. There were no effects on the consolidated statement of comprehensive income for the current year to date. The reclassification of leasehold land as property, plant and equipment has been accounted for retrospectively and certain comparatives have been restated as shown below: -

Additional information required by the BMSB's Listing Requirements

1 Review of performance

The revenue recorded in Q3 2011 increased by 28% to RM30 831 million as compared to Q3 2010. However the profit before tax of the Group increased by 3% to RM1.422 million as compared to the previous year's corresponding quarter due to lower margins realized by the property and construction division from sales of lower end projects.

2 Variance of results against preceding quarter

The Group's turnover for the current quarter rose by 19% to RM30 831 million as compared to RM26.016 million recorded in the preceding quarter. Correspondingly, profit before tax rose by 32% to RM1.422 million. This is due to the completion of several projects on hand.

3 Current year / future prospects

The recent unveiling of the My First House Scheme under the new Budget bodes well for the property sector. As many of the mass housing schemes under the Group's townships are priced below the RM220,000 mark, the Group is optimistic about the effect of the announcement.

Although mass housing townships will continue to be a main source of income for the Group, it will introduce more upmarket communities in the coming year to cater to a more affluent target; a segment that seems to be increasing in tandem with improving wealth levels of society.

The market response for the Group's townships are still encouraging. Barring unforeseen circumstances, the Group remains positive and optimistic about the year ahead.

The higher effective tax rate as compared to the statutory tax rate of 25% for current year is mainly due to the unavailability of group relief losses incurred by certain subsidiaries and disallowing certain expenses for tax purposes.

There was no sale of unquoted investments and properties of the Group for the current quarter under review and financial year to date.
