INTERIM FINANCIAL REPORT ON UNAUDITED CONSOLIDATED RESULTS FOR THE SECOND QUARTER ENDED 30 JUNE 2018

EXPLANATORY NOTES TO THE CONDENSED FINANCIAL STATEMENTS

1. Basis of preparation and accounting policies

The interim financial statements have been prepared in accordance with Malaysian Financial Reporting Standards ("MFRS") 134 *Interim Financial Reporting* and Paragraph 9.22 of the Main Market Listing Requirements of Bursa Malaysia Securities Berhad, and should be read in conjunction with the Group's audited financial statements for the year ended 31 December 2017.

a) Transition to the MFRS Framework

The Group is a transitioning entity as defined by the Malaysian Accounting Standards Board and this is the Group's first interim financial report prepared in accordance with the MFRS, including the MFRS 1 - *First-time Adoption of MFRS* ("MFRS 1") and the Amendments to MFRS 116 and MFRS 141 *Agriculture : Bearer Plants* which is effective for annual periods beginning on or after 1 January 2016.

In the previous financial years, the financial statements of the Group were prepared in accordance with Financial reporting Standards (FRSs) in Malaysia. As required by MFRS 1, the Group has consistently applied the same accounting policies in its opening MFRS statement of financial position as at 1 January 2017 and throughout all the financial years presented, as if these policies had always been in effect. Comparative information in this interim financial report have been restated to give effect to these changes and the financial impact on the transition from FRS to MFRS are disclosed as follows:

i. Effects of MFRS 1

No significant impact to the Group as the basis adopted previously are consistent with MFRS.

ii. Effects of Amendments to MFRS 116 and MFRS 141 Agriculture : Bearer Plants

Property, plant and equipment - Bearer plants

Prior to the adoption of the Amendments to MFRS 116 and MFRS 141 Agriculture: Bearer Plants ("Amendments"), all the new planting expenditure and replanting expenditure incurred from the land clearing to the point of harvesting were capitalised under plantation development expenditure accounts and were amortised based on estimated annual yield over 25 years upon maturity. Upon adoption of the amendments, the net carrying amount of the plantation development expenditure are now reclassified to bearer plants as part of the Group's property, plant and equipment.

Biological assets

Prior to the adoption of the Amendments, agricultural produce growing on bearer plants were not recognised. Following the adoption of the Amendments, these biological assets within the scope of MFRS 141 are measured at fair value less costs to sell. The changes in fair value less costs to sell of the biological assets were recognised in profit or loss.

iii. Effects of MFRS 15 Revenue from Contracts with Customers

The Group will be applying the full retrospective approach and will be availing the practical expedients for its completed contracts as at 31 December 2017 that have variable consideration ("VC"). The Group will be using the transaction price at the date the contract was completed rather than estimating the VC amounts in the comparative reporting periods. These are applicable on the following, the VCs arising from liquidated ascertained damages ("LAD"), variation orders and extension of contract period which are applicable to Group's ICT and Power segments.

Other than reclassification of balances due from/to customers under construction contracts which were previously categorised under trade and other receivables to contract assets and contract liabilities in the statement of financial position, the adoption of MFRS 15 has no other impact to the financial statements of the Group.

13. Group's Financial Performance Review and Segmental Analysis

For the period ended 30 June 2018, the Group registered revenue of RM232.6 million and a profit before zakat and tax ("PBT") of RM13.4 million, representing a decrease of 7% and 29% respectively as compared to the corresponding period last year.

The segmental performance review as compared to the corresponding period last year are as follows:

Energy Sector: The sector's revenue and PBT fell by 15% or RM31.1 million and 24% or RM3.4 million respectively primarily as a result of weaker sales volume recorded in all product segments due to adverse market conditions and stiff competition which led to further margin compression and negatively impacted the sector's core operating performance.

Agro Sector: The revenue grew 71% or RM14.8 million contributed mainly from the palm oil mill in Mukah, Sarawak which began operations in July 2017 and the newly acquired plantation land in Sabah since January 2018. Despite the higher turnover, the sector registered losses in the current period predominantly due to lower average crude palm oil ("CPO") prices, higher field upkeep expenses by the estates as well as operating losses incurred by the mill due to low fresh fruit bunches ("FFB") processed and low oil extraction rates ("OER") recorded.

ICT Sector: The decline in revenue by 23% or RM4.1 million was largely due to the reduction in the value of contracts recognised in the current period and delay in commencement of several projects. As a result of this and combined with the effect of lower operating margins and higher administrative expenses, the sector recorded a loss before tax of RM0.3 million in the current period.

Power Sector: The increase in the number of projects undertaken during the current period resulted in a two-fold rise in revenue to RM10.7 million compared to the previous year. The PBT however, was substantially contributed by the reversal of over provision of costs of RM3.6 million relating to projects performed in previous years.

Property Sector: The sector's profit in the current period was enhanced by the gain on disposal of a building in Gombak, Selangor and Pekan Razaki, Ipoh amounting to RM2.6 million.

Food Sector (classified under discontinued operations): The increase in revenue in the current period was largely supported by the opening of an additional eight (8) restaurant outlets since the previous corresponding period. The sector, however, registered losses of RM0.5 million as compared to a PBT of RM0.9 million previously due to the decline in same-store sales as well as the lackluster performance of its new outlets.

14. Profit before tax for the current quarter compared to the immediate preceding quarter

	Individual Quarter				
	3 months	3 months			
	30/6/2018	31/3/2018	%		
	RM'000	RM'000	+/(-)

Continuing Operations					
Revenue	111,810	120,740	(7.4)

Profit from operations	5,003	8,132	(38.5)		
Finance income	535	380			
Finance costs	(1,918)	(1,902)			
Share of profit of associates	1,556	1,627			
Profit before tax	5,176	8,237	(37.2)		
Zakat	(684)	(24)			
Income tax expense	(1,087)	(1,613)			
Profit for the period	3,405	6,600	(48.4)		

In comparison with the preceding quarter, the revenue and PBT in the current quarter were impacted by the unfavourable financial performances of the Energy, Agro and ICT sectors. This however was mitigated by the lower administrative expenses in the current quarter as well as several exceptional items namely the reversal of over provision of project costs amounting to RM1.6 million by the Power sector and a gain on disposal of properties of RM0.6 million (preceding quarter of RM4.8 million).

15. Prospects

The Group continues to foresee a challenging and competitive economic environment for the second half of the year particularly in the core sectors ie. Energy, Agro and ICT sectors.

The prospects of the Group's business sectors are as follows:

Energy Sector: The sector will remain as the leading revenue and earnings contributor to the Group in FY2018. Demand for LPG is expected to remain robust but nonetheless, intense competition and escalating input costs will continue to exert pressure on the operating margins. With the determined effort to counter these factors through aggressive marketing strategies, improvement in supply chain management specifically in the areas of inventory and dealer management, and our plans to boost distribution capacity by the establishment of a satellite bottling plant (which is expected to commence operations in Q4 2018), the Group anticipates the second half year performance for the sector to be better.

Agro Sector: We anticipate our performance to be neutral owing to continuous subdued outlook of CPO prices due to the higher palm oil production supply in the market which is predicted to outpace consumption.

On the other hand, and barring adverse weather conditions, we expect FFB production prospects to be potentially encouraging. While our replanting activities are projected to reduce the contribution of our Johor estates, an overall uptrend in FY2018 is anticipated from our newly acquired plantation land in Sabah which has a much robust yield and age profile. We will also undertake efforts to optimise our production costs in order to preserve our bottom line.

Meanwhile for our Mill in Mukah, we will continue to focus on mitigating its operational challenges in order to meet its planned production capacity targets and ideal oil extraction rates.

ICT and Power Sectors: These sectors will continue to aggressively bid for further sizeable contracts whenever the opportunity arises to enhance our order book and at the same time focus on the execution of existing projects. Both sectors will also actively explore new sources of revenue growth to create more recurring and sustainable income in the future.

In addition, the Group will continue to further strengthen the various operational improvement and cost management initiatives that have been carried out since previous years.
