Note: <sup>1</sup> The deficit was a result of the Group's capital management initiatives carried out during the financial year ended 31 December 2012. The Company ("Digi.Com Berhad") received dividends from one of its subsidiaries in the form of bonus issue of redeemable preference shares and capital repayment amounting to RM509.0 million and RM495.0 million respectively. The Company had declared part of these as special dividends to its shareholders. The deficit arose from the elimination of these intragroup dividends at Group level.

#### B9. Financial Instruments - cont'd

### Accounting Policy - cont'd

### (a) Foreign currency risk

The Group enters into foreign currency forward contracts to minimise its exposure to foreign currency risks as a result of transactions denominated in currencies other than its functional currency, arising from the normal business activities; in accordance with the Group's hedging policy. In line with the Group's hedging policy, hedging is only considered for firm commitments and highly probable transactions of which hedging shall not exceed 100% of the net exposure value. Firm commitments are netted-off against receivables denominated in the same currency, and only the net exposures are hedged so as to maximise the Group's natural hedge position.

### (b) Interest rate risk

The Group manages its interest rate risk by having a mixed portfolio of fixed and floating rate financial liabilities that is consistent with the interest rates profiles acceptable to the Group. To manage this, the Group enters into interest rate swaps, in which the Group agrees to exchange, at specified intervals, a fixed interest rate for floating rates.

The Group uses interest rate swaps to hedge the fair value risk in relation to the fixed interest rates of IMTN with notional principal amounts of RM1,075 million. The interest rate swaps entitles the Group to receive interest at a fixed rate ranging from 3.50% to 4.65% per annum, and in return, pays interest quarterly at floating rate plus a spread. The swaps mature at varying dates based on the maturity of different tranches of IMTN.

Speculative activities are strictly prohibited. The Group adopts a layered approach to hedging, where a higher percentage of hedging will be executed for closer-dated exposures and with time, increase the hedge as the probability of the underlying exposure increases. The derivatives and their underlying exposures will be monitored on an on-going basis.

There were no changes in the cash requirement of the derivatives since the end of the previous financial year ended 31 December 2020.

Derivatives are stated at fair value which is equivalent to the marking of these derivatives to market, using prevailing market rates. Derivatives with positive market values (unrealised gains) are included under assets, whereas derivatives with negative market values (unrealised losses) are included under liabilities in the statement of financial position. Any gains or losses arising from derivatives held for trading purposes, or changes in fair value on derivatives during the financial period that do not qualify for hedge accounting are recognised in profit and loss.

### **Credit Risk Management Policy**

Foreign currency forward contracts and interest rate swap transactions are executed only with credit-worthy financial institutions in Malaysia that are governed by appropriate policies and procedures.
