13. Review of performance

For the current quarter under review, the Group recorded a revenue of RM982.6 million, a decrease of RM137.7 million or 12.3% as compared to the previous corresponding quarter. Profit before tax, meanwhile, decreased 25.8% or RM17.2 million to RM49.4 million over the same period.

For the six months period ended 31 January 2019, the Group recorded a revenue of RM2,058.3 million, a decrease of RM133.9 million or 6.1% as compared to the corresponding period of the preceding year of RM2,192.2 million. Profit before tax stood at RM94.7 million, dropped by 18.4% or RM21.3 million over the same period.

Despite commendable performance from operations in Malaysia, the Group profit before tax declined in the current quarter, mainly attributable to lower or negative contributions from overseas operations. Indonesia turned in marginal profit while losses were recorded in China. On cumulative quarters basis, these overseas operations, particularly China, had incurred losses that further affected the Group earnings. In addition, the overall performance was also influenced by net foreign exchange movements as follows:-

	Individua	l Quarter	Cumulativ	ve Quarter

Malaysia segment

For the current quarter and cumulative quarters, Malaysia segment recorded 5.4% and 7.4% increase in revenue respectively due to higher sales orders from key customers. Meanwhile, profit before tax was up 12.7% and 9.2% respectively over the same period.

(Company No. 88160-P) (Incorporated in Malaysia)

13. Review of performance (Cont'd)

Malaysia segment (Cont'd)

The higher-than-proportionate increase in profitability was attributable to increase in productivity with production lines running at more optimal level, as well as absence of setup costs associated with commissioning of new lines that incurred during the same quarter and cumulative quarters a year ago.

<u>Indonesia segment</u>

For the current quarter, Indonesia segment recorded lower profit before tax in tandem with the fall in revenue, mainly due to decline in sales orders from key customers. The steeper drop in profitability was a result of lower economies of scale and weaker Indonesian Rupiah compared to the preceding year's corresponding quarter.

Despite recording profit for the quarter under review, Indonesia segment was loss-making for the cumulative quarters as the profit in the current quarter was insufficient to set off the loss incurred in the first quarter.

China segment

China segment recorded lower revenue and was loss-making for the current quarter as a result of lower sales orders completed. By comparison, there was a large sales order completed for a key customer in the preceding year's corresponding quarter which contributed to the much higher profitability then.

Operations in China were also loss-making for the cumulative quarters in the absence of economies of scale as the facilities there remained under-utilised with less-than-ideal volume of sales orders received.

14. Variation of results against preceding quarter

Company		

For the current quarter under review, the Group recorded a higher profit before tax of RM49.4 million as compared to RM45.3 million in the preceding quarter mainly attributable to the followings:-

	Current Quarter 31 January 2019 RM'000	Preceding Quarter 31 October 2018 RM'000
(Gain)/loss on disposal of a subsidiary	(2,425)	5,418

(Company No. 88160-P) (Incorporated in Malaysia)

15. Current year prospects

As mentioned in our previous quarterly report, the Group expects prospects and profitability in the second half of current financial year to be lower than that of first half due to softening in orders from certain key customers. However, based on the latest order pipeline visibility, the impact appears to be less austere than initially thought, as we have since received additional orders for a particular product and this would partially cushion the moderation in orders.

The temporary moderation in orders has not in any way detracted the Group from its focus to grow the business. This is especially true under the current scenario where the US-China trade war has opened up many opportunities for the Group as various MNC brands are seriously considering relocating their manufacturing base to Southeast Asia. Malaysia, and in particular, our Group stand to benefit from this move. In response, concerted efforts have been put in by the Group with the establishment of a special business development taskforce to pursue these opportunities.

Within the short span of a few months, the taskforce has clinched its first success by securing Bissell International Trading Company, B.V. ("BISSELL") as a new customer. On 27 February 2019, the Group has entered into the Master Supply Agreement with BISSELL to manufacture products for them. Backed by a history of more than 140 years, BISSELL is a leading brand in small homecare appliances in the USA. We are confident that BISSELL has high potential to be a key customer in future. Earnings from this new customer would start contributing to the Group from financial year ending 31 July 2020 onwards.

Over in China, the outlook continues to be highly challenging at this juncture given the uncertainties that include the US-China trade war, rising operating cost structure and intense competition. The issue of under-utilization of capacity is expected to prevail at this juncture. As counter-measures, management continues to be streamlining operations to improve its positioning and operational flexibility.

Given the aforementioned expected slowdown in order, the Board opines that the financial performance of the Group in the second half of the financial year will be softer. Despite the short-term challenges, the Board remains positive on the long-term prospects of the Group, underpinned by solid fundamentals, robust relationships with existing customers, strong execution skills, recent addition of new key customer and potential future contract wins.
