13. Review of performance (Cont'd)

Malaysia segment

For the current quarter and cumulative quarters, Malaysia segment posted 8.6% and 7.6% increase in revenue respectively due to higher sales orders from key customers. Meanwhile, profit before tax was up 56.0% and 31.0% respectively over the same period.

The higher-than-proportionate increase in profitability was attributable to improvement in production efficiency leading to greater economies of scale in the absence of set-up costs associated with commissioning of new lines that incurred during the same quarter and cumulative quarters a year ago, as well as owing to a more favourable product sales mix.

Indonesia segment

Indonesia segment recorded profit before tax for the quarter under review mainly due to better product sales mix. Indonesia segment recorded a lower profit before tax for the cumulative quarters in line with the lower revenue.

China segment

China segment recorded a lower revenue for the current quarter and cumulative quarters as a result of lower sales orders completed. Operations in China were loss-making for the current quarter and cumulative quarters in the absence of large sales orders which resulted in lack of economies of scale as the facilities remained under-utilized. During the financial year, results from China segment were further impacted by net loss on disposal of plant and equipment, impairment loss on plant and equipment and termination benefits to staff and employees amounting to approximately RM35.0 million.

For the current quarter under review, the Group recorded a higher profit before tax of RM41.0 million as compared to RM38.2 million in the preceding quarter, mainly attributable to higher sales orders from key customers despite the impairment loss on plant and equipment of RM22.1 million provided by the operations in China.

15. Current year prospects

The Group managed to turn in a good set of results for the financial year ended 31 July 2019 despite the difficult operating environment across Malaysia, Indonesia and China where the Group operates in. The overall consumer and business sentiments remain subdued amidst the US-China trade tension and fear of potential global economic growth slowdown in the next two years. This led to uncertainties with many adopting a wait-and see attitude. With the tough environment expected to prevail, the Group is focusing its efforts to contain cost, optimize productivity and enhance value creation for its customers.

Meanwhile, the business development taskforce in Malaysia continues to engage with prospective customers to negotiate terms while pursuing various sales leads arising from trade diversion activities. As mentioned previously, there is silver lining to the ongoing US-China trade war as many MNC brand owners are relocating their manufacturing base from China to Southeast Asia, with Malaysia being one of the choice locations. As one of the leading Electronics Manufacturing Services (EMS) providers in Malaysia as well as in the region, the Group stands to benefit from this diversion. It is also opportune that the Group has ready production facility to take up these new businesses. Management is positive that it could secure more new customers in the coming financial year.

Over in China, the Group's operations remains highly challenging. The US-China trade tension, while beneficial to Malaysia, is affecting business sentiment in China, adding further pressure to the operations there. Performance has been and continues to be impinged by rising cost while export sales to the US is declining due to the trade war. The issue of under-utilization of capacity is expected to prevail. As counter-measures, the Group has been streamlining its operations, formulating a stronger financial position with an asset-light model and lower-gearing structure and higher liquidity. By adopting an asset-light and lower-cost model, the Group should be able to improve its operational flexibility, strengthen and stabilize its financial position and minimise the adverse impact on the business operations.

The Board opines that the financial performance of the Group in the next financial year to be satisfactory. Despite the short-term challenges, the Board remains positive on the longterm prospects of the Group, underpinned by solid fundamentals, robust relationships with existing customers, strong execution skills, recent addition of new key customers and potential future contract wins.
