13. Review of performance

For the current quarter under review, the Group recorded a revenue of RM1,034.6 million, a decrease of RM38.3 million as compared to the previous year corresponding quarter, largely due to lower contribution from China. Profit before tax, meanwhile, increased 40.5% or RM18.4 million to RM63.7 million over the same period.

The improved earnings for the current quarter was mainly attributable to much smaller losses from the operations in China following restructuring and streamlining of operations by adopting an asset-light and lower-cost model, coupled with the absence of loss on disposal of a subsidiary amounting to RM5.4 million recognized in the preceding year corresponding quarter.

.

The comparison of the results of the segment are tabulated below:-

	Individual Quarter 31 October		
	2019 RM'000	2018 RM'000	
Revenue			
Malaysia	879,866	884,064	
Indonesia	70,220	75,304

Malaysia	64,680	65,933	
Indonesia	1,085	(1,273)	
China	(3,097)	(20,363)	

Malaysia segment

Malaysia segment posted a marginal decrease in revenue of RM4.2 million in the current quarter by comparison to previous year corresponding quarter. In tandem with the decrease in revenue, profit before tax dropped by RM1.3 million over the preceding year corresponding quarter. Profit before tax margin was relatively stable.

Indonesia segment

Indonesia segment recorded profit before tax of RM1.1 million for the quarter under review as compared to loss before tax of RM1.3 million in the preceding year corresponding quarter mainly due to better product sales mix.

China segment

China segment recorded a lower revenue for the current quarter as a result of lower sale orders completed. Losses narrowed significantly during the quarter under review due to lower operating expenses incurred following streamlining activities and adopting an asset-light model with lower gearing structure. Additionally, there was also the absence of loss on disposal of a subsidiary amounting to RM5.4 million recognized in the preceding year corresponding quarter.

(Registration No. 198201008437 (88160-P)) (Incorporated in Malaysia)

14. Variation of results against preceding quarter

	Current Quarter 31 October 2019	Preceding Quarter 31 July 2019
	RM'000	RM'000
Revenue	1,034,596	1,038,168
Profit before tax	63,669	48,892
Profit attributable to owners of the		
Company	48,073	56,263

For the current quarter under review, the Group recorded a higher profit before tax of RM63.7 million as compared to RM48.9 million in the preceding quarter, mainly attributable to the absence of impairment loss on plant and equipment of RM22.1 million provided by the operations in China as well as refund of investment cost of RM7.9 million from an associate.

15. Current year prospects

The overall consumer and business sentiments remain subdued amidst the ongoing US-China trade tension and fear of potential global economic growth slowdown in the next two years. This led to uncertainties with many adopting a wait-and see attitude. With the tough environment expected to prevail, the Group is focusing its efforts to contain cost, optimize productivity and enhance value creation for its customers.

Meanwhile, the business development taskforce in Malaysia continues to engage with prospective customers to negotiate terms while pursuing various sales leads arising from trade diversion activities. As mentioned previously, there is silver lining to the ongoing US-China trade war as many MNC brand owners are relocating their manufacturing base from China to Southeast Asia, with Malaysia being one of the choice locations. As one of the leading Electronics Manufacturing Services (EMS) providers in Malaysia as well as in the region, the Group stands to benefit from this diversion. It is also opportune that the Group has ready production facility to take up these new businesses. Management is positive that it could secure more new customers in the near future.

Over in China, the Group's operations remains highly challenging. The US-China trade tension, while beneficial to Malaysia, is affecting business sentiment in China, adding further pressure to the operations there. The issue of under-utilization of capacity is expected to prevail. On a brighter note, following the streamlining exercise in the past financial year that involved strengthening financial position by adopting an asset-light model and lower-gearing structure and higher liquidity, the operations are now much leaner with lower operating expenditures.

The Board opines that the financial performance of the Group for the remaining quarters to be satisfactory. Despite the short-term challenges, the Board remains positive on the long-term prospects of the Group, underpinned by solid fundamentals, robust relationships with existing customers, strong execution skills, recent addition of new key customers and potential future contract wins.
