13. Review of performance

For the current quarter under review, the Group recorded a revenue of RM505.7 million, a decrease of RM382.6 million as compared to the previous year corresponding quarter, largely due to temporary closure of factories following the Movement Control Order ("MCO") imposed by the Government from 18 March 2020. This, coupled with losses incurred in Indonesia, had consequently resulted in the Group suffering a loss before tax of RM26.9 million as compared to a profit before tax of RM38.2 million in the previous corresponding quarter.

For the nine months period ended 30 April 2020, the Group recorded a revenue of RM2,360.6 million, a decrease of RM579.6 million or 19.7% when compared to the corresponding period of the preceding year of RM2,940.2 million. Profit before tax stood at RM80.3 million, having dropped by RM52.7 million or 39.6% over the same period due to the same reason mentioned above.

The comparison of the results of the segment are tabulated below:-

	Individual Quarter 30 April		Cumulative Quarter 30 April

Malaysia segment

For the current quarter and cumulative quarters, Malaysia segment recorded a 51.3% and 22.2% decrease in revenue respectively owing to the temporary closure of factories following the MCO as mentioned above. Meanwhile, although production was halted during this period, fixed operating costs such as, amongst others, depreciation, staff and production workers' salaries, as well as financing costs continued to incur. With the substantial decrease in revenue during the temporary production halt, it was insufficient to cover the fixed overheads and financing costs. As a result, a loss before tax of RM19.7 million was incurred for the current quarter whereas profit before tax declined by 43.7% for the cumulative quarters.

Indonesia segment

13. Review of performance (Cont'd)

in the preceding year corresponding quarter, mainly due to less favourable sales mix and inventories written off that amounted to RM3.0 million.

For the cumulative quarters, Indonesia segment continued to incur loss largely owing to under-utilization of production capacity and inventories written off as mentioned above.

China segment

For the current quarter and cumulative quarters, China segment recorded lower revenue as a result of lower sale orders completed. In addition, turnover for the current quarter was further affected considering that operations only resumed on 17 Feb 2020 instead of immediately after the Chinese New Year holiday due to lockdown imposed by the Chinese Government to battle the Novel Coronavirus ("Covid-19") pandemic. Nevertheless, losses narrowed significantly for the cumulative quarters owing to lower operating expenses incurred following the streamlining of activities and adoption of an asset-light business model with lower gearing structure.

For the current quarter under review, the Group incurred a loss before tax of RM26.9 million as compared to a profit before tax of RM43.5 million in the preceding quarter mainly due to temporary closure of factories following the MCO imposed as mentioned above.

15. Current year prospects

The operating environment has been very difficult during the current financial year. Amidst a decelerating global economy plagued by uncertainties arising from the ongoing US-China trade tension, the world was thrown into chaos by the unprecedented challenges brought forth by the Covid-19 pandemic.

The Group's production in Malaysia was halted from 18 March 2020 in adherence to the MCO imposed by our Government in combating the spread of the virus. Operations resumed subsequently during the later part of April 2020 under the conditional MCO phase after obtaining the regulatory approvals. Production pace has since picked up steadily and is currently operating at full capacity, while in compliance to the Standard Operating Procedures ("SOPs").

15. Current year prospects (Cont'd)

With the resumption of operations, the Group expects to return to profitability in the coming quarter. Nevertheless, it is without doubt that the situation remains challenging and demanding. With consumer spending across the world affected by the impact of economic loss arising from the Covid-19 pandemic as well as the resultant strict movement control measures, the overall order flow from customers during the current financial year is expected to be lower than the previous year. At present, visibility of order flow is also shorter as compared to previously.

Meanwhile, the discussions with prospective customers continued to be hindered by the restriction on international travels. Meaningful progress may only be achieved as and when the international travel restriction is lifted.

On a brighter note, with countries now progressively opening up their economies, the situation should be improving gradually. The recovery phase is a positive development provided the virus spread is brought under control with no major recurrence of spike in cases.

On balance, given the aforementioned factors and considering the performance thus far, the overall results of the Group for the current year is expected to be lower than the previous year, although the longer term prospects of the Group remain intact. Under the stewardship of the experienced Board and management team, which is further backed by strong balance sheet, the Group is confident to navigate through the prevailing challenges.
