The much enhanced earnings in the current quarter boosted the cumulative quarters' bottom line higher by 1.4% as compared to previous year's cumulative quarters despite revenue lower by 11.0% over the same period.

The comparison of the results of the segment are tabulated below:-

14. Review of performance (Cont'd)

Malaysia segment (Cont'd)

Profit before tax was up by 87.7% and 3.1% respectively over the same period attributable to higher overall utilisation rate of production capacity leading to better economies of scale as well as favourable product sales mix as mentioned above.

Singapore segment

Singapore segment, which acts as the marketing arm for Malaysia operations, recorded a lower profit before tax for the current quarter in tandem with the decrease in revenue. On cumulative basis, lower profit before tax was recorded despite increase in revenue due to higher operating expenses incurred.

Indonesia segment

Indonesia segment recorded profit for the current quarter under review in line with the increase in sales orders from a key customer. On cumulative basis, the segment made a marginal loss mainly due to lower sales orders from a key customer in the previous quarters.

China segment

The operations in China continued to incur losses due to the highly difficult operating conditions in the country. Without significant orders, the limited revenue generated was unable to offset the fixed costs.

15. Variation of results against preceding quarter

	Current Quarter 30 April 2024 RM'000	Preceding Quarter 31 January 2024 RM'000
Revenue	1,010,515	895,022
Profit before tax	69,704	19,521
Profit attributable to owners of the		
Company	54,423	16,001

For the current quarter under review, the Group recorded a higher profit before tax mainly attributable to increased orders from key customers which in turn improved the overall utilisation rate of production capacity, along with better product sales mix.

16. Current year prospects

While the macro operating environment remained challenging, the Group is experiencing healthy pickup in sales orders from our key customers following improved consumer sentiments and normalisation of our customers' inventory levels. In addition, launches of several new product models by certain customers serve to sustain market interests as well.

(Registration No. 198201008437 (88160-P)) (Incorporated in Malaysia)

16. Current year prospects (Cont'd)

On balance, we expect this progressive uptrend in orders to prevail into the near foreseeable future.

On another positive note, with the recent successful development of several new processes in-house, the Group has strengthened our vertical integration capability. Mass production for our key customer has already started for some of these processes. At the same time, we continue to have active engagements with our key customers to explore further opportunities that are value-accretive to both parties.

Aside from that, the ongoing discussions with prospective customers remain in progress and we look forward to expanding our clientele by the end of the calendar year.

The Board opines that the financial performance of the Group for the remaining quarter to continue reflecting improving performance, firmly backed by our lean balance sheet with low net gearing and healthy cashflow.
