### Additional information required by the listing requirements of Bursa Malaysia

### B1 Review of performance

The Group recorded a turnover of RM51.275 million for the three months ended 30 June 2008 compared to RM52.271 million for the corresponding quarter ended 30 June 2007. The profit before taxation for the three months period was RM2.212 million compared to a loss before tax of RM1.412 million for the corresponding quarter ended 30 June 2007.

The turnaround from loss to profit after taxation for the three months period ended 30 June 2008 was attributable to effective cost control measures and the effect in 2007 of a significant provision for doubtful debts offset by the gain on disposal of an investment.

# B2 Material changes in the quarterly results compared to the results of the preceding quarter

The Group recorded a turnover of RM51.275 million and a profit before tax of RM2.212 million for the current quarter compared to a turnover of RM46.465 million and loss before taxation of RM16.509 million for the preceding quarter. The higher turnover for the current quarter was mainly attributable to increased billings on finalization of contract Variation Orders. The turnaround from loss to profit before tax for the current quarter was attributable to effective cost control measures, the finalization of contract Variation Orders generating additional revenue and the effect in the preceding quarter of a provision for impairment of an investment.

For the purposes of comparison with the preceding quarter, the results for that quarter are those included in the audited annual financial statements, not those shown in the unaudited quarterly report for the preceding quarter. The differences were an increase in the gross loss for the preceding quarter of RM0.4 million and an increase in the loss after tax of RM2.09 million.
