### 1. Review of Performance

For the current quarter under review, the Group posted a turnover of RM9.707 million as compared to RM13.458 million achieved in the preceding year corresponding quarter, representing a decrease of approximately 28% mainly caused by lower turnover registered by the ICT segment. For this financial period under review, the Group recorded a turnover of RM31.639 million, which is a decrease of approximately 23% compared to preceding year corresponding period of RM41.343 million due mainly to the drop in sales of certain mapping and Telematics products from the ICT segment. The performance of the respective segment of the Group is summarized as follows:-

## **ICT Segment**

For the current quarter and period under review, ICT segment registered lower revenue and profit before tax as compared to preceding year corresponding quarter and period mainly attributed to the decrease in profit margin and sales volume slowdown in the supply of certain mapping and Telematics products to existing customers.

However a loss was reported due to start-up expenses incurred on the commencement of several new infrastructure civil works.

## Others Segment

Loss registered during the current quarter and period was mainly attributed to the borrowing costs and outgoing expenses incurred on the three storey office warehouse building.
