**(B) EXPLANATORY NOTES PURSUANT TO MAIN MARKET LISTING REQUIREMENTS OF
BURSA MALAYSIA SECURITIES BERHAD**

1. Review of Performance

For the current quarter ended 31 May 2016, the Group generated a turnover of RM9.43 million and loss after tax of RM0.53 million, as compared to a turnover of RM10.98 million and loss after tax of RM0.53 million registered in the preceding year corresponding quarter. Despite improvement in the TIS segment, loss reported during the current quarter mainly due to the drop in performance in the ICT business segment and the lack of new sales from the Property Development segment during the current quarter under review.

For the current financial period ended 31 May 2016, the Group reported a turnover of RM17.85 million and loss after tax of RM1.27 million, as compared to turnover of RM19.41 million and loss after tax of RM0.89 million achieved in the preceding year corresponding period. Higher loss was reported in the current financial period mainly attributed to lower performance from the ICT segment, lack of new sales from Property Development segment and the share of higher loss of associated companies' results.

The performance of the respective segment of the Group is summarized as follows:-

ICT Segment

Lower turnover and higher loss after tax was recorded during the quarter and period under review as compared to preceding year corresponding quarter and period. This was mainly due to the slowdown in the demand of Telematics related products and services from existing customers. In addition, the drop in profit margin is affected by the increased in material and operating costs.

Property Development Segment

The turnover and profit posted during the current period was primarily attributable to the sales of residential properties and profit recognition from the development works in progress.

TIS Segment

An increase in turnover and higher segment profit after tax was achieved during the current quarter and period as compared to preceding year corresponding quarter and period. This was mainly driven by higher progress billings from various on-going projects and profit achieved via an increase number of completed civil infrastructure works and projects.

Others Segment

Loss recorded during the current period and preceding year corresponding period was attributed to the operating costs incurred by the investment holding company.
