## Amendments to FRS 117: Leases

Prior to the adoption of the Amendments to FRS 117, leasehold lands were treated as operating leases. The upfront payments made represents prepaid lease payment and was amortised evenly over the lease term of the land. Upon the adoption of the Amendments to FRS 117, the classification of a leasehold land as a finance lease or an operating lease is based on the extent to which risks and rewards incident to ownership lie.

Accordingly, the Group has changed the classification of the leasehold land from operating leases to finance leases in the current period. The Group had applied the amendment to the standard retrospectively. Certain comparatives of the statement of financial position as at 31 December 2009 have been restated as below:

# PART B: EXPLANATORY NOTES PURSUANT TO APPENDIX 9B OF THE MAIN MARKET LISTING REQUIREMENTS OF BURSA MALAYSIA SECURITIES BERHAD

# B1. Review of Performance

Note B1 should be read in conjunction with Note A14 above.

The Group recorded higher revenue for the fourth quarter of 2010 ("Q4 2010") of RM18.042 million, an increase of 27.9% over the corresponding preceding quarter of 2009 ("Q4 2009"). This growth was driven by stronger customer demand. Revenue contribution from Americas region for Q4 2010 stood at RM4.921 million or an increase of 52% compared to RM3.238 million in Q4 2009 mainly due to wider customer base in the said region. Asia Pacific and Europe regions registered 24.7% and 13.9% incremental in revenue respectively in Q4 2010, as compared to Q4 2009.

The strengthening of Ringgit Malaysia against major currencies such as United States Dollar ("USD"), Great Britain Pound ("GBP") and Euro ("EUR") has slightly dampened Group's gross profit margin in Q4 2010 as compared to Q4 2009. The effect, however, was mitigated by cautious spending as well as cost savings from production automation and process improvements. The Group registered RM1.328 million profit attributable to the owners of the parent for Q4 2010 as compared to loss of RM3.506 million in Q4 2009. For record, in Q4 2009, the Group recognised RM4.2 million fair value loss in relation to an investment property located at Jalan Tandang.

On year-to-date basis, revenue for the year ended 31 December 2010 stood at RM66.514 million, which represents a growth of 23.5% from RM53.858 million reported for year ended 31 December 2009. The increased top-line resulted in a RM6.008 million profit attributable to the owners of the parent, as compared to a loss of RM4.173 million in prior year. The Group's earnings before interest, tax and depreciation ("EBITDA") improved to RM15.745 million for the twelve months period in 2010, an increase of 58.3% as compared to RM9.945 million in corresponding periods of 2009.

The Group Balance Sheet as at 31 December 2010, comparatively is in a stronger position as the total shareholders' funds have increased to RM39.109 million from RM37.024 million as at 31 December 2009. The Group has also retired some bank borrowings from the proceeds of the disposal of an investment property in addition to settlement via internal generated funds, reducing the Group's gearing ratio to 0.86 times as at 31 December 2010 as compared to 1.58 times as at 31 December 2009.

# B2. Variation of Results Against Preceding Quarter

	Current Quarter 31.12.2010 RM	Preceding Quarter 30.09.2010 RM
Revenue – Seals	18,042	17,216
Results		
Seals	1,174	1,857
Investment holding	18	(20)
Profit before tax	1,192	1,837

Profit from continuing operations	1,254	1,837
Loss for the period from discontinued operations	(59)	(131)
Profit for the period	1,195	1,706

The Group's revenue has grown by 4.8% in the Q4 2010 compared to the third quarter of 2010 ("Q3 2010"). The Group's profitability, however, was marginally lower mainly due to unfavorable foreign exchange effect to the Group's profit margin.

#### **B3.** Prospects of the Group

The Group has embarked on various strategies under its business transformation program over the past three years to turn around the Group. In 2010, the Group had achieved its primary objective from the business transformation program i.e profits for the year and stronger financial position.

Recently, the Group has completed its Capital Reduction exercise to restructure its balance sheet in order for it to be more reflective of the fundamentals and capital structure of the Group.

The Group is confident that the following are the key areas that will drive the growth of the Group moving forward:

- The Group will continue to invest in product and service innovation as a key driver for longterm growth. The focus of the innovation activities is to ensure that the Group would be able to differentiate itself by producing products that bring more value to customers as well as to capture new market segments;
- (ii) The Group has invested in building its global sales and distribution network over the past few years. This network will enable the Group to aggressively grow market share and capture long-term contracts from global customers. The Group will continue to strengthen its reach and effectiveness by implementing sales and distribution strategies to capture new segments of the global market;
- (iii) The Group will continue to focus on improving its production capabilities in order to improve its operational and cost efficiencies, through initiatives such as automation and reengineering of processes; and
- (iv) As the Group is aggressively growing its market share, the Group has put in place capability to quickly scale up production capacity.

Recently, there are already signs of cost escalation especially for raw materials and labour, which will put pressure on profit margin of the Group. However, the Group regards that the escalation of raw material prices and labour costs is not only specific to the Group but also applicable to other players within the industry, hence limiting competitors' possibility to have a sustainable advantage over the Group. Nevertheless, the Group will take necessary measures to mitigate the adverse impact arising from the cost escalation.

In addition, external factors such as the strengthening of the Ringgit Malaysia against the major currencies such as USD, GBP and EUR may also pose challenges to the Group to maintain its profit margin. However, the overall prospects of the Group in year 2011 are expected to be positive.
