2 Changes in Accounting policies

The significant accounting policies adopted are consistent with those of the audited financial statements for the financial year ended 30th June 2006 except for the adoption of the following new/ revised Financial Reporting Standards (" FRS") effective for the financial period beginning 1 July 2006:

FRS 2	Share -based Payment
FRS 3	Business Combinations
FRS 101	Presentation of Financial Statements
FRS 102	Inventories
FRS 108	Accounting Policies, Changes in Estimates and Errors
FRS 110	Events after the Balance Sheets Date
FRS 116	Property, Plant and Equipment
FRS 121	The Effects of Changes in Foreign Exchange Rates
FRS 127	Consolidated and Separate Financial Statements
FRS 132	Financial Instruments : Disclosure and Presentation
FRS 133	Earnings Per Share
FRS 136	Impairment of Assets
FRS 138	Intangible Assets
FRS 140	Investment Property

The revised FRS which would be adopted from the financial period beginning 1 July 2007 are:

FRS 117	Leases
FRS 124	Related Party Disclosures

The adoption of the above FRS, except for FRS3 and FRS140, does not have significant financial impact on the Group. The principle effects of the changes in accounting policies resulting from the adoption of the other new/revised FRSs are discussed below:

(a) FRS 2: Share-based Payment

This FRS requires an entity to recognize share-based payment transactions in its financial statements, including transactions with employees or other parties to be settled in cash, other assets, or equity instruments of the entity.

Prior to 1 January 2006, no compensate expenses was recognised in income statement over the vesting period of the grants with a corresponding increase in equity. The compensation expenses is determined by reference to the fair value of share option at the date granted and the number of share options to be vested by vesting date. At every balance sheet date, the Group revises its estimates of the number of share options that are expected to vest by the vesting date. Any revision of this estimate is included in income statement and a corresponding adjustment to equity over the remaining vesting period.

The Group has adopted the transitional provision in FRS 2 to include only share options that were granted after 31 December 2004 and not yet vested on 1 January 2006. There is no option to be granted and exercised under ESOS after 31 December 2004, carried out by the Company. This change in accounting policy is applied prospectively and the comparatives as at 30th June 2006 are not restated.

The Employee Share Option Scheme has expired on 11 March 2007 and accordingly, all options offered has lapsed and all rights and entitlements granted thereon has been cancelled and become null and void.

(b) FRS 3: Business Combination , FRS 136 : Impairment of Assets and FRS 138: Intangible Assets

The new FRS 3 has resulted in consequential amendments to two other accounting standards, FRS 136 and FRS 138.

The adoption of these new FRSs, goodwill is now carried at cost less accumulated impairment losses and is tested for impairment annually, or more frequently, if the events or changes in circumstances indicate that it might be impaired. Any impairment loss is recognized in the income statement and subsequent reversal is not allowed.

Under FRS 3, any excess of the Groups' interest in the net fair value of acquirees' identifiable assets, liabilities and contingent liabilities over cost of acquisitions (previously

referred to as "negative goodwill"), after reassessment, is now recognized immediately in income statement. Prior to 1 July 2006, negative goodwill was first set-off against the consolidated balance sheet. In accordance with the transitional provisions of FRS 3, the negative goodwill as at 1 July 2006 of RM0.679 million was derecognized with a corresponding increase in retained earnings.

(c) FRS 101: Presentation of Financial Statements

The adoption of the revised FRS 101 has effected the presentation of minority interest, share of net after-tax results in associates and other disclosures. In the consolidated balance sheet, minority interests are now presented within total equity. In the consolidated income statement, minority interests are presented as an allocation of the total profit or loss for the period. A similar requirement is also applicable to the statement of changes in equity. FRS 101 also requires disclosure, on the face of the statement of changes in equity, total recognized income and expenses for the period, showing separately the amounts attributable to equity holders of the parent and to minority interest.

The current period's presentation of the Group's financial statements is based on the revised requirement of FRS 101, with the comparatives restated to conform to the current period's presentation.

(d) FRS 121: The Effect of Changes in Foreign Exchange Rates

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The consolidated financial statements are presented in Ringgit Malaysia, which is the Company's functional and presentation currency.

As of 1st January, goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate. In accordance with the transitional provision or FRS 121, this change is applied prospectively. Prior to 1st January 2006, goodwill and fair value adjustment arising on acquisition of a foreign entity are deemed to be assets and liabilities of the parent and company and were translated using the exchange rate at the date of acquisition.

(e) FRS 140: Investment property

FRS 140 defines an investment property as a property held for long term rental yield and/ or for capital appreciation and, that is not occupied by the companies in the Group.

The investment properties previously classified under property, plant and equipment, were not disclosed as a separate line item on the face of the consolidated balance sheet within Non-current assets.

The Group adopted the cost model to measure all its investment properties. Under the cost model, investment property is measured at depreciated cost less any accumulated impairment losses.

In line with FRS 101, the comparative is restated to conform to the current presentation. The effect to the Group arising from this change in accounting policy is as below:-
