199401039944 (325631- V) (Incorporated in Malaysia)

### **B3.** Current Year Prospects (continued)

Non-residential buildings and civil engineering subsectors recorded positive growth in a quarteron-quarter comparison of 4.8% and 6.0% respectively. In contrast, the Special trade activities and Residential buildings subsectors contracted to 0.5% and 3.7% respectively.

The Department of Statistics Malaysia also reports that in the second quarter of 2022, the civil engineering subsector remained dominant as the main contributor to the value of work done with 36.6% share. Besides that, Non-residential buildings subsector contributed 31.4% while Residential buildings and Special trades activities contributed 23.0% and 9.0% respectively.

The report also stated that the private sector grew 14.8% with 58.1% share of total value of work done (RM17.4 billion) as compared to the public sector which contracted to 4.0% (Q1 2022: - 17.6%) with 41.9% share of total value of work done (RM12.5 billion).

(Source: Quarterly Construction Statistics, Second Quarter 2022, Department of Statistics Malaysia)

The construction sector contracted by 2.1% in the first half of 2022, mainly due to lower construction activities in civil engineering and residential buildings subsectors. In contrast, non-residential buildings and specialised construction activities subsectors registered a growth during the same period, in line with expansion in business activities, albeit rising prices of construction-related materials. The sector is expected to turn around in the second half with an expansion rate of 6.9%, supported by positive growth in all subsectors. Improvement in private investment and robust domestic economic activities are anticipated to increase demand for more industrial buildings. In addition, the acceleration of major infrastructure projects will continue to drive the sector's performance.

The construction sector is forecast to expand by 4.7% in 2023 following a better performance in all subsectors. Civil engineering subsector is anticipated to rebound buoyed by implementation of new projects such as Mass Rapid Transit Line 3 ("**MRT3**") Circle Line and acceleration of ongoing infrastructure projects which include, Rapid Transit System ("**RTS**") Link, East Coast Rail Link ("**ECRL**") and Light Rail Transit Line 3 ("**LRT3**").

In addition, the approved investment projects in the manufacturing sector are anticipated to come onstream and subsequently creating a greater demand for industrial buildings. Hence, the non-residential buildings subsector is projected to expand further. Meanwhile, the residential buildings subsector is expected to grow steadily supported by more construction of affordable houses, in line with the strategy under the 12<sup>th</sup> Malaysia Plan ("**12MP**"). In addition, incentive offered by the Government to encourage home ownership through the i-MILIKI programme is expected to spur demand for residential buildings while addressing the property overhang issue.
