Notes To The Unaudited Financial Report

For the Quarter Ended 30 June 2023

B3. Prospects for the Next Financial Year

The Malaysian economy is expected to continue to expand, supported by resilient domestic demand, improving labour market conditions, higher tourism activity and further progress of multi year investment projects. Domestic financial conditions also remain conducive to financial intermediation amid sustained credit growth, for which the prospects augus well for the Financial Service segment.

The Group's Financial Services' outlook is expected to be bright as we continue to expand the corporate finance advisory business, intensify the client coverage activities to secure deal origination opportunities and take on more initial public offering exercises and secondary offerings, and grow the stock brokerage and margin financing business by further enhancing our online trading platform and broadening the client base beyond the small and medium enterprises market.

For the Property Investment and Development, the Group's Alstonia project was completed and the Group has delivered the vacant possession to the owners in July 2023.

The Investment Holding unit is a supporting segment of the Group. This segment does not generate significant external revenue, and its activities relate to offering management services to the Group.

Barring unforeseen circumstances, the Board is cautiously optimistic that the Group will deliver a satisfactory performance for the new financial year.
