The Group recorded a higher turnover of RM131.07 million in the current reporting period ended 31 October 2024 compared to RM105.94 million recorded in the previous year's corresponding reporting period ended 31 October 2023. The increase in turnover was mainly due the higher orders and shipment of office furniture from our Malaysian operations as sentiments amongst US businesses turned positive following business uncertainties during the pandemic years. Hiring among American companies remain strong and more employees are returning to the office, leading to higher spending on office equipment and furniture. Shipment of home furniture from our Vietnam factories were slightly lower as home furnishing spendings amongst American families remain subdued following the pandemic peak spending on household finishing in 2022 and 2023.

In line with the higher turnover, gross profit from our operations rose from RM17.79 million in the previous year's corresponding reporting period ended 31 October 2023 to RM25.84 million in the current year's reporting period ended 31 October 2024. The better operational results were mainly driven by lower overheads and labour costs absorption rates amid higher capacity utilisation rate in our Malaysian operations during the reporting period under review. The higher gross profit from our Malaysian operations helped mitigate the weaker gross profit from our Vietnamese operations amid continued low-capacity utilisation rate.

In line with the higher turnover, selling and distribution expenses were slightly higher at RM6.78 million for the current reporting period ended 31 October 2024 compared to RM5.74 million in the previous year's corresponding period ended 31 October 2023. Administration expenses, however were lower at RM6.50 million for the current reporting period ended 31 October 2024 compared to RM7.16 million in the previous year's corresponding period ended 31 October 2023.

The Group recorded net deficit in other income of RM0.91 million in the current reporting period ended 31 October 2024 against a net other income of RM10.52 million in previous year's corresponding period ended 31 October 2023. The significant difference was mainly due to foreign exchange losses of RM4.86 million during the current reporting period ended 31 October 2024 compared to the foreign exchange gains of RM5.58 million in the previous year's corresponding reporting period ended 31 October 2023.

The significant reversal of the net other income gave rise to a lower profit before tax of RM11.34 million in the current reporting period ended 31 October 2024 against RM15.08 million recorded in the previous year's corresponding reporting period ended 31 October 2023.

## **B2.** MATERIAL CHANGE IN PROFIT BEFORE TAX

The Group recorded higher turnover of RM131.07 million in the current reporting period ended 31 October 2024 compared to RM105.15 million recorded in the preceding reporting period ended 31 July 2024. This was mainly attributable to the seasonal peak shipment prior to the festive season in furniture spendings especially for the office segment.

In line with the higher shipment of furniture, gross profit improved from RM16.95 million in the preceding reporting period to RM25.84 million in the current reporting period due to the better factory utilisation in both our Malaysian and Vietnamese operations. In line with the higher turnover, selling and distribution expenses were higher at RM6.78 million in the current period under review compared to RM5.37 million in the preceding period ended 31 July 2024. Administrative expenses were however lower at RM6.50 million against RM7.00 million over the 2 comparative reporting periods. Give the significantly higher gross profit

for the current reporting period ended 31 October 2024, the profit before tax rose to RM11.34 million in the current reporting period under review against profit before tax of RM4.38 million in the preceding reporting period ended 31 July 2024.

#### **B3. PROSPECT FOR THE CURRENT FINANCIAL YEAR**

Some reports state that US consumers were substantially more optimistic about future business conditions and remained positive about future income in the recent months. However, the latest US Federal Reserve interest rate cut by 25 basis points, and implying much slower pace of rate cut in the coming year, indicating a still-elevated inflation. This could affect consumers' spending and demand for durable household items including furniture.

Although we expect less turbulence in the US currently with the elections behind us, the future direction of the country remains unpredictable. The latest statement by the US Federal Reserve shares such sentiments. The pace and sustainability of growth are subject to government policies and economic structures and this will affect the direction of the world economy. The volatility of the USD currency against Malaysian Ringgit will just bring more uncertainties to the Group. Given the above, we expect that the prospect of the Group to be mixed for the forthcoming year.

## **B4. VARIANCE OF ACTUAL PROFIT FROM FORECAST PROFIT**

There are no profit forecast or profit guarantee issued for the current reporting year.

Income tax for our local operations in the current financial year ended 31 October 2024 was estimated at RM6.55 million which was slightly lower than the current statutory rate of 24%, due to non-taxable on certain other incomes. Taxation from the foreign subsidiaries was accounted for RM1.95 million, of which taxation for the Vietnamese subsidiary was estimated at RM1.78 million or at taxation rate of 19% against the incentive tax rate of 15% due to some non-business incomes which were charged under statutory rate of 20% and some non-tax deductible expenses in the current reporting year ended 31 October 2024.
