B3 Commentary on prospects for 2014

The global economy climate will likely remains challenging as there is remain uncertainty which is the greatest threat to the world economy at the present. Although the global economic conditions are challenging, it is still expected to continue growing, albeit at a moderate pace. Barring a drastic change in the global economic conditions, the Group's core business is not expected to be significantly affected. The Group will continue with its competitive strategies of further developing its own brands to enhance its market positioning and concentrate on improving its operations efficiency to further enhance its competitiveness.

Taking into consideration the abovementioned factors and subject to the global economic conditions, the Board of Directors is cautiously optimistic that the Group will report a satisfactory performance and growth for the financial year ending 31 December 2014.
