The Group recorded a revenue of RM98.8 million during the current quarter and year-to-date ended 31 March 2022 representing 30% increase from the RM76.1 million recorded in the same period in the previous year. The Group's current quarter and year-to-date revenue from manufacturing segment of RM93.7 million is a 31% increase from the RM71.6 million revenue derived in the same period in the previous year. Current quarter revenue from trading segment increased 13% from RM4.4 million to RM4.9 million compared to the same period in the previous year.

The increase in the Group's sales revenue in the current quarter is due to increase in sales volume from increased demand after movement restrictions are further relaxed while almost all economic, education and social activities are on-going as Malaysia is in Phase 4 of the National Recovery Plan. In contrast, due to spike in COVID-19 cases, the Malaysian Government reintroduced movement restrictions under the Movement Control Orders ("MCO") during the same period last year where most of the economic, education and social activities were prohibited, therefore demand for bottled water had reduced significantly.

There is a reversal of loss allowance in the current quarter and year-to-date ended 31 March 2022 instead of a credit loss provision compared to same period in the previous year because there is a decrease in expected credit loss as collection thrend improved as the economy gradually recovers from the pandemic.

The increase in allowance for and write off of inventories in the current quarter and year-to-date ended 31 March 2022 is mainly due to routine writing off of inventories that are slow moving and obsolete which is in line with the increase in sales.

#### 18. FUTURE PROSPECTS

The notable events such as the on-going COVID-19 pandemic, the geopolitical tension caused by the Russia-Ukraine war, the rising global inflation risk, the higher energy prices, interest rate hikes and forex volatility will have adverse effects on both the global and domestic economies. However, with our transition to the endemic phase of COVID-19 in April 2022, we are cautiously optimistic that the sale volume of bottled water will improve further.

We are actively managing the supply chain and material costs challenges. We will exercise caution in the conduct of our business activities to ensure adherence to the requisite health and safety requirements imposed by the Government. We will continue to focus on our core brands and further automate and enhance our production processes and capacity. We will gradually introduce sustainable packaging alternatives for our bottled water products.

We will continue to strengthen the differentiation of Spritzer products by highlighting the benefits of our silica rich mineral water and also the absence of microplastics in Spritzer natural mineral water in laboratory tests conducted by SIRIM Berhad.

The Group is taking prudent measures to monitor and manage the higher input and operating costs and at the same time, actively taking steps to grow our sales volume and as far as possible, to expand the overseas market. We will focus on sustaining our sales revenue and to safeguard our market share in the bottled water industry.
