Additional information required by Bursa Malaysia Securities Bhd Listing Requirements

1. Review of the Performance of the Company and Its Principal Subsidiaries

The Supermax Group's performance for the quarter under review versus the corresponding quarter of the previous financial year is tabled below:

| Description | 3 rd Qtr 2013 3 rd Qtr 20 | | Increase/(Decrease) | | |
|-------------------------|---|---------|---------------------|-------|--|
| Description | RM '000 | RM '000 | RM'000 | % | |
| Revenue | 284,564 | 245,513 | +39,051 | +15.9 | |
| Profit before tax (PBT) | 40,526 | 33,836 | +6,690 | +19.8 | |
| Profit after tax (PAT) | 36,449 | 31,600 | +4,849 | +15.3 | |

The Group's revenue was higher by 15.9% or RM 39.0 million compared to the previous year corresponding quarter. This was mainly due to higher output from refurbished and new lines. The increased revenue as well as lower raw material costs has enabled the Group to achieve higher profitability, with PBT and PAT rising by 19.8% and 15.3% respectively.

2. Comparison with Preceding Quarter's Result

The Group's current quarter performance versus the preceding quarter is tabled below:

| Description | 3 rd Qtr 2013 2 nd Qtr 2013 | | Increase/(Decrease) | | |
|-------------------------|---|---------|---------------------|--------|--|
| Description | RM '000 | RM '000 | RM'000 | % | |
| Revenue | 284,564 | 330,004 | (45,440) | (13.8) | |
| Profit before tax (PBT) | 40,526 | 39,802 | +724 | +1.8 | |
| Profit after tax (PAT) | 36,449 | 34,873 | +1,576 | +4.5 | |

The Group's revenue was 13.8% lower compared to the preceding quarter, in tandem with lower raw material prices and lower output as the Group accelerated its automation program which involved the short term shutting down of lines. This is a temporary and necessary measure to ensure higher productivity going forward. However, the Group benefitted from lower raw material prices and cost-mitigating measures to record 1.8% higher PBT and 4.5% higher PAT compared to the preceding quarter.

3. Prospects

Rubber Prices

Rubber latex prices have continued to slide in the third quarter of 2013, averaging RM5.35 per kg wet compared to RM5.72 and RM6.14 per kg wet in the preceding 2 quarters. Presently, rubber demand remains soft, last traded at RM5.07 per kg wet on 22.11.2013, the lowest level seen this year. Prices are not expected to strengthen anytime soon owing to the fragile economic state of the Eurozone and US and also slowdown in China. We expect rubber prices to trade between RM4.80 and RM5.30 for the rest of 2013.

In terms of synthetic nitrile latex material, the prices of this raw material have generally been stable over the past few quarters at around the USD1,250 per mtw level. However, oversupply on the part of the nitrile latex suppliers have seen prices dip to as low as USD975 per mtw level in August 2013 before recovering to the current USD1,150 level. We expect nitrile latex prices to hover between USD1,100 - USD1,125 per metric ton wet for the rest of 2013.

Foreign exchange rates

The USD had been relatively stable in the first half of 2013, hovering at below the USD1:RM3.10 level. Post-elections saw the RM strengthen against the USD to slightly below USD1:RM3 but it was short-lived. The USD has since strengthened considerably, rising above the USD1:RM3.30 level before stabilising at the USD1:RM3.20 level in recent weeks. The USD is expected to continue strengthening further against major currencies including RM. The strengthening of the USD and the weakening of RM is positive for Malaysian exporters including the Supermax Group as it brings higher export sales proceeds and potentially higher income for Supermax Group.

As at 28th November 2013, the US Dollar / Malaysian Ringgit currency pairing is trading at USD1:RM3.23 and we expect the US Dollar to continue to strengthen further against the Ringgit.

Robust global demand

Despite the slowdown in the Eurozone and US, demand for gloves from these regions, particularly for nitrile gloves, remains robust. Demand growth is however, significantly stronger in the emerging markets, in the regions such as the Middle East and also Africa, not to mention Asia with China and India leading the way.

Manufacturing and Process Automation

Most of the manufacturing plants in the industry, including Supermax's plants, are already highly automated. However, there are some remaining processes, particularly the stacking and packing processes, which still require a lot of manual labour. The automation programme to automate these remaining processes is being fast-tracked in response to the need to reduce dependency on foreign labour. This process would invariably lead to some output loss but it is a necessary step for future gain. Ultimately, this would enable the Supermax Group to further increase productivity and manufacturing efficiency and remain at the forefront in terms of global competitiveness. In addition, all the new manufacturing facilities would be fully automated & equipped with manufacturing automation process fully built-in as part of the capital expenditures.

Expansion Plans

Expansion of Nitrile Latex Examination Gloves Capacity

The Group is also moving ahead with fast tracking its plans to build & complete plants #10 and #11 in Meru, Klang within the next few months. These new plants will have lines that are built

to be inter-switchable between natural rubber and Nitrile glove production but have currently been earmarked for Nitrile in tandem with market demand.

Capacity from the 2 new plants will be commissioned in batches starting from the 1st quarter of 2014, and when fully commissioned, it would increase the Group's Nitrile glove capacity by 6.9 billion gloves which is more than double the Supermax Group's current Nitrile capacity from 5.4 billion pieces per annum to 12.3 billion pieces per annum. This increase in production capacity will result in Nitrile Gloves forming 53% of the Supermax Group's total installed capacity while NR Latex Gloves will form the balance 47%.

Though we anticipate competition would be more intense on Nitrile Glove, we have factored into our budget with profit margins ranging from 9% to 11% from the increased revenue generated by the additional capacity that Supermax Group would be adding to the market in year 2014.

Thus, the additional capacity will not only enable the Group to reduce the lead times to meet demand for Nitrile Gloves but also improve profitability through higher efficiency and better productivity. In addition, the increase in production capacity of Nitrile Glove would contribute NOT just to the Manufacturing Division in terms of additional new sales & additional profits, but also provide additional new sales and additional profits to Supermax Group's overseas distribution activities, providing additional income and increase in market shares of Nitrile Gloves where the Group's overseas distribution companies operate.

Glove City Project

With fully-owned subsidiary Maxter Glove Manufacturing Sdn Bhd's (MGM) development of plants #10 and #11 in Meru, Klang, nearing completion next year, MGM will move on to its Glove City Project.

The entire project will encompass 6 manufacturing plants which will be built over the next 10 - 12 years. Each plant would have an installed capacity of 4.1 billion pieces. Construction of the first plant is targeted to commence in the 3rd Quarter of 2014.

Acquisition of industrial land measuring 100 acres in Serendah for Supermax Business Park Project

Supermax has also recently acquired a large piece of industrial land measuring 100-acres in Serendah, Selangor, to build the **Supermax Business Park**. The idea and vision is to create a win-win situation whereby 60% of the land area will be used by Maxwell Glove Manufacturing Bhd (formerly known as Seal Polymer Industries Bhd), a wholly owned subsidiary of Supermax, to build an **Integrated Glove Manufacturing Complex (IGMC)** to produce nitrile gloves, and the balance 40% of the land will be developed for the Supermax Group's supporting industries such as the chemical, packaging and porcelain/ceramic former suppliers, and engineering and automation companies, to set up their operations here.

The 40% portion of land allocated for the supporting industries will have a Gross Development Value (GDV) of RM350-400 million and is targeted to be fully developed within 3 to 5 years. For the remaining 60% of the land reserved for the development of Maxter Glove Manufacturing Sdn Bhd's IGMC, it will be developed in 2 phases at a total cost of between

RM700 million and RM750 million with total of 40 production lines with production capacity of 15.5 billion pieces per annum. Details are as follows:

| | Phase 1 | Phase 2 |
|---|---------------------|--------------------|
| Development period | 2014-2018 | 2019-2022 |
| Installed capacity - high capacity & high efficiency lines - pieces of gloves | 28 10.85 billion | 12 4.65 billion |

The proposed manufacturing facilities will employ the very latest technology in nitrile glove manufacturing which would make this the most advanced, efficient and productive manufacturing facilities in the region.

The acquisition will enable the Company to aggressively expand its production capacities to meet the current and future growing demand for nitrile gloves.

This is in addition to the capacity expansion which is currently being carried out by Maxter Glove Manufacturing Sdn Bhd, another fully-owned subsidiary of Supermax Group based in Klang, Selangor.

While we are increasing production output of Nitrile gloves, we have been maintaining our manufacturing margins of Nitrile Glove at between 11% - 13% to be in line with global market prices, especially Nitrile gloves from China & Thailand. This is in line with our objective to be globally competitive.

4. Variance of Actual and Forecasted Profit and Shortfall in Profit Guarantee

This is not applicable to the Group for the current quarter under review.

5. Taxation and Variance between the Effective and Statutory Tax Rate

| | Quarter Ended 30.9.2013 RM '000 | Year-to-Date Ended 30.9.2013 RM '000 |
|--------------|---------------------------------------|--|
| Income tax | 4,077 | 13,681 |
| Deferred Tax | - | - |
| Total | 4,077 | 13,681 |

The effective tax rate of the Group is lower than statutory income tax mainly because of tax incentives such as reinvestment allowances claimed by certain subsidiary companies.

6. Profit/(Loss) On Sale Of Unquoted Investment and/or Properties

15. Management of Latex Cost Fluctuations

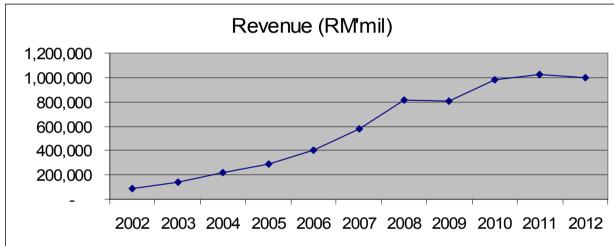

Rubber latex costs, the main raw material cost in the manufacturing of rubber gloves, forms a high percentage of the Group's costs and any increase in this cost item must be well managed.

The Group has a pricing mechanism in place whereby any fluctuation in this cost component is factored into the pricing process for the Group's rubber glove products. What this means is that effectively, the cost increases can be passed on to consumers, albeit with a short time lag, thus maintaining the Group's profitability. However, when latex costs are on a continuous rising trend, the ability to fully pass on all rising costs is adversely affected and results in margin squeeze. Below are 3 line graphs depicting the correlation between the price of NR and nitrile rubber latex and the Group's Sales Revenue.

| NR Latex | Q1 2012 | Q2 2012 | Q3 2012 | Q4 2012 | Q1 2013 | Q2 2013 | Q3 2013 | 22 Nov 13 |
|----------|---------|---------|---------|---------|---------|---------|---------|-----------|
| RM/kg | 7.43 | 7.12 | 5.99 | 5.85 | 6.14 | 5.72 | 5.35 | 5.07 |

16. Management of Foreign Exchange Rate Fluctuations

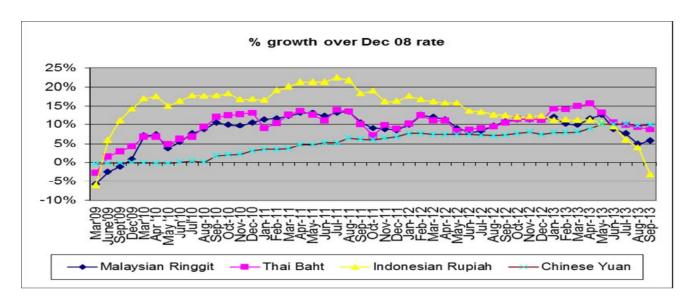

Currency trend for competing nations

Foreign exchange is another factor that may have a significant impact on the Group's performance. While the USD has strengthened against the Ringgit in recent months, the RM remains at an elevated level against the USD over the longer term, reflecting a similar trend among the currencies of most of the major rubber glove producing countries. In the case of the Thai Baht and the Chinese Yuan, they have both appreciated against the USD by 9% and 10% respectively compared to 6% for the Ringgit since 2008. The rupiah, however, has fallen nearly 9% this year, reflecting concerns about the country's widening current-account deficit, rising inflation and slowing economic growth. In conclusion, Malaysian exports remain competitive against the major competing nations.

A table showing the movement in USD:MYR exchange rate since Q1 2012 is as follows:

| FOREX | Q1 2012 | Q2 2012 | Q3 2012 | Q4 2012 | Q1 2013 | Q2 2013 | Q3 2013 |
|-----------|---------|---------|---------|---------|---------|---------|---------|
| (MYR/USD) | 3.06 | 3.13 | 3.12 | 3.06 | 3.08 | 3.07 | 3.24 |

Below is a graph and table depicting the currency growth of the major rubber glove producing countries.

Currencies of Major Rubber Glove Producing Countries

| | Jan- 13 | Feb- 13 | Mar- 13 | Apr- 13 | May- 13 | Jun- 13 | Jul- 13 | Aug- 13 | Sept- 13 |
|-------------------|------------|------------|------------|------------|------------|------------|------------|------------|-------------|
| Malaysian Ringgit | 12% | 10% | 10% | 12% | 12% | 9% | 8% | 5% | 6% |
| Thai Baht | 14% | 14% | 15% | 16% | 13% | 10% | 10% | 9% | 9% |
| Indonesian Rupiah | 11% | 11% | 11% | 11% | 10% | 9% | 6% | 4% | -3% |
| Chinese Yuan | 7% | 8% | 8% | 8% | 9% | 10% | 10% | 10% | 10% |

The USD has recently appreciated against most major currencies including MYR. Nevertheless, so long as any MYR appreciation against the USD is in tandem with the currencies of the other major rubber glove producing countries, gloves made in Malaysia will remain globally competitive.
