#### 3. Prospects

Having secured most of the approvals for the waste to energy project in Sri Lanka, moving forward, the Group aims to achieve its financial close for its project in Sri Lanka towards third quarter 2013 and commence construction of its plant in Colombo thereafter. The Group is also progressively commissioning its waste to fuel plant in Port Klang by next quarter and positioning itself for sublicensing of its technology. These are expected to contribute positively to the CleanTech division and the Group.

Efforts are being carried out continuously by the Group to remedy the effect of declining business and profit margin for the Coatings division which is dependent on its existing market in consumer electronics sector which are dependent on the economic and financial recovery in Japan, Europe and the United States. The Group is looking into diversification and penetration into new potential markets in other industrial sectors such as automotive industry and highend coatings for the electrical and electronics sector.

The Board will continue to monitor the progress of both divisions vigilantly and implement various measures to turnaround the Group's profitability. The Board will also work closely with the consultants to formulate and implement regularisation plan as per the timeline imposed by Bursa Malaysia Securities Berhad pursuant to PN17 of the Listing Requirements.

The Group prospects is heavily dependent on the successful outcome of discussions with the lenders on the proposed debt restructuring scheme and successful implementation of the waste to energy and waste to fuel projects.
