#### 17. Commentary on Prospects

Malaysia's economic growth is set to slow down in 2023 as global economy is expected to experience a mild recession amid stagnation/recession in major advanced economies on the impact of high inflation and the resultant high interest rates. The Group will continue to implement its business strategies cautiously as well as to closely monitor and continue to adapt to the challenging and uncertain economic environment.

The diversification of principal activities to include new business ventures such as food processing business, hatchery business, fruit planting business and delivery services of frozen and chilled products will provide an opportunity for the Group to grow its revenue and enhance its business portfolio to drive an improved financial performance.

The Board remains cautiously optimistic that the ongoing new businesses will contribute positively to the future profits of the Group in FY 2023.
