As compared to the preceding quarter ended 31 January 2019, the Group recorded a lower revenue figure of RM2.43 million with a corresponding decrease of consolidated profit before tax figure of RM348 thousand. The lower performance is due to the reversal of provisions no longer required in the preceding quarter. The decrease in orders/sales also contributed to the lower performance in the current quarter.

# **B3.** Prospects for the current financial year

The current financial year will remain competitive and challenging for the Company. The global economy is experiencing some headwinds with the still unresolved trade dispute between the 2 major economies i.e. China and the U.S.A. The volatile nature of raw material costs coupled with lower demand will inevitably affect the Group's performance. Against this backdrop, the Board will continue to focus on improving production and cost efficiency to enable the Company to continue to improve its performance.

## **B4.** Variance of actual profit from financial forecast or financial guarantee

The disclosure requirement is not applicable for the Group.
