Notes To The Interim Financial Report For Quarter Ended 30 September 2014

13 Review of Performance

The Group recorded higher revenue at RM22.3 million in the current quarter as compared to RM12.2 million registered in the corresponding quarter last year. The higher revenue recorded was due to increase in sales orders from both the automated equipment segment as well as the automated manufacturing solution operating segment as a result of higher demand from the semiconductor sector. Consequently, the Group recorded a higher profit before tax of RM2.4 million in the current quarter as compared to the profit before tax of RM0.5 million in the previous corresponding quarter mainly due to the increase in sales and better product mix in this reporting quarter.

Performance of the respective operating segments for the current quarter as compared to the previous corresponding quarter is analysed as follows:-

1) Automated equipment

The increase in revenue by RM9.2 million to RM17.7 million as compared to the previous corresponding quarter was mainly contributed by higher demand for automated equipment from semiconductor market. With the increase in revenue and better product mix achieved, this segment recorded a higher profit before tax of RM3.3 million in the current quarter as compared to the profit before tax of RM0.5 million in the previous corresponding quarter.

2) Automated manufacturing solution

Revenue from this segment was RM1.0 million higher than the previous corresponding quarter mainly due to higher demand for the integrated manufacturing solution from customers in the current quarter. Despite the higher revenue achieved, this segment recorded a loss before tax of RM0.5 million in the current quarter as compared to the marginal profit before tax of RM96,000 in the previous corresponding quarter due to the change in sales mix with lower margin achieved.

Notes To The Interim Financial Report For Quarter Ended 30 September 2014

Material Changes in the Quarterly Results as Compared with the Preceding Quarter

For the third quarter ended 30 September 2014, the Group recorded lower revenue at RM22.3 million as compared to the revenue of RM26.7 million in the preceding quarter. The lower revenue achieved was mainly due to decrease in sales from the automated equipment segment which was offset by the higher revenue contribution from the automated manufacturing solution operating segment. Nevertheless, the Group recorded a profit before tax of RM2.4 million as compared to a profit before tax of RM2.5 million in the preceding quarter.

Performance of the respective operating segments for the third quarter ended 30 September 2014 as compared to the preceding quarter is analysed as follows:-

1) Automated equipment

The drop in revenue by RM5.8 million in the current quarter to RM17.7 million as compared to the preceding quarter was mainly due to lower demand for automated equipment from semiconductor market in the current quarter. However, this segment recorded a higher profit before tax of RM3.3 million as compared to RM2.8 million achieved in the preceding quarter due to better product mix with higher margin achieved.

2) Automated manufacturing solution

Revenue from this segment was RM1.4 million higher than the preceding quarter mainly due to higher demand for the integrated manufacturing solution from customers in the current quarter. However, this segment recorded a loss before tax of RM0.5 million in the current quarter as compared to the marginal profit before tax of RM58,000 in the previous corresponding quarter mainly due to the change in sales mix with lower margin achieved.
