Notes To The Interim Financial Report For Quarter Ended 30 September 2017

14 Review of Performance

The Group recorded higher revenue at RM83.3 million in the current quarter as compared to RM40.7 million registered in the corresponding quarter last year, representing an increase of 104.8 %. The higher revenue recorded was mainly due to increase in sales from automated equipment and smart control solution system segment which was partially offset by the decrease in sales from automated manufacturing solution segment. Taking into account the non-recurring expenses of RM4.7 million, the Group recorded a profit before tax of RM9.4 million in the current quarter. Should the effects of the non-recurring expenses be excluded, the Group would have exhibited a pre-tax profit of RM14.1 million which is RM5.7 million (67.9%) higher than the pre-tax profit of RM8.4 million in the previous corresponding quarter.

Performance of the respective operating segments which includes inter-segment transactions for the current quarter as compared to the previous corresponding quarter is analysed as follows:-

1) Automated equipment

This segment recorded an increase in revenue by RM53.1 million to RM72.7 million as compared to the previous corresponding quarter. The substantial revenue growth of 270.9% was primarily driven by the increase in demand for our MEMS & smart sensor test handler solutions due to the increasing prevalence of smart sensors in telecommunication and semiconductor segment. As a result of higher revenue achieved, this segment recorded a higher profit before tax of RM14.3 million against profit before tax of RM6.1 million in the previous corresponding quarter, which represented an increase of 134.4%. However, the increase in profit before tax was not in tandem with the increase in revenue due to the difference in sales mix.

2) Automated manufacturing solutions

Revenue from this segment in the current quarter was RM9.7 million lower against revenue of RM19.1 million in the previous corresponding quarter. This was due to lower demand for the integrated manufacturing solution from customers in the current quarter. As a result of lower revenue achieved, this segment recorded a loss before tax of RM1.6 million as compared to profit before tax of RM2.6 million in the previous corresponding quarter.

3) Smart control solution system

This segment recorded an increase in revenue by RM1.1 million to RM3.0 million for the current quarter under review. Due to the slight increase of revenue achieved, this segment recorded a lower loss before tax of RM0.2 million as compared to the loss before tax of RM0.4 million in the previous corresponding quarter.

Material Changes in the Quarterly Results as Compared with the Preceding Quarter

For the third quarter ended 30 September 2017, the Group recorded higher revenue at RM83.3 million as compared to the revenue of RM54.8 million in the preceding quarter, representing an increase of 52.0%. The higher revenue recorded was mainly due to increase in sales contribution from automated equipment segment which was partially offset by the lower revenue from both automated manufacturing solutions and smart control solution system segment. Taking into account the non-recurring expenses of RM4.7 million, the Group recorded a profit before tax of RM9.4 million in the current quarter. Should the effects of the non-recurring expenses be excluded, the Group would have exhibited a pre-tax profit of RM14.1 million which is RM2.3 million higher than the pre-tax profit of RM11.8 million in the previous corresponding quarter.

Performance of the respective operating segments which includes inter-segment transactions for the third quarter ended 30 September 2017 as compared to the preceding quarter is analysed as follows:-

1) Automated equipment

The increase in revenue by RM32.1 million in the current quarter to RM72.7 million as compared to the preceding quarter was mainly due to the continuous increase in demand for our MEMS & smart sensor test handler solutions from customers in telecommunication and semiconductor segment. Consequently, this segment achieved a higher profit before tax of RM14.3 million as compared to RM7.9 million in preceding quarter.

2) Automated manufacturing solutions

Revenue from this segment in the current quarter was RM7.4 million lower against revenue of RM16.9 million in the preceding quarter. This was due to lower sales recorded for the integrated manufacturing solution as a result of timing of the project delivery. As a result of the lower revenue achieved, this segment recorded a loss before tax of RM1.6 million in the current quarter as compared to the profit before tax of RM5.4 million in the preceding quarter.

3) Smart control solution system

Revenue from this segment was RM0.9 million lower than the preceding quarter. As a result of lower revenue achieved coupled with the difference in sales mix, this segment recorded a loss before tax of RM0.2 million as compared to the profit before tax of RM0.8 million in preceding quarter.
