("PCB" or "Company")

Notes To The Interim Financial Report For Period ended 30 June 2022

Performance of the respective operating segments which includes inter-segment transactions for the current quarter as compared to the previous corresponding quarter is analysed as follows:

#### 1) Automated test equipment

The ATE segment continued to contribute the larger portion of revenue and profit to the Group's results for the first half of 2022 at a revenue contribution rate of 75.4%. After witnessing an increase in revenue in 2021, this segment continued to record a substantial growth in revenue by 37.9% from RM96.9 million in 2Q2021 to RM133.6 million in 2Q2022 resulting to an overall increase of 48.7% in the first half of 2022 to RM264.2 million (1H2021: RM177.6 million). Riding on the global momentum for automotive electrification, the automotive industry continued to dominate the ATE segment with its revenue contribution of approximately 44.6%, a phenomenon witnessed since beginning of 2022. Influenced predominantly by the mass adoption of electric vehicle, the automotive market continued to be a standout. The Group benefitted by this structural shift with its automotive test solutions that covers front-end tester for new compound substrate such as silicon carbide ("SiC") and gallium nitride ("GaN") to back end solutions for power electronics devices such as IGBT (insulated-gate bipolar transistor) and power MOSFET (metal-oxide-semiconductor field-effect transistor). Generally, the automotive sector will continue to play a significant role in fueling the growth of the Group's ATE segment. With the extensive applications of SiC and GaN coupled with China joining the bandwagon in building the supply chain revolving around SiC, such proliferation and development will continue to provide impetus to the Group's exposure in the automotive industry.

Revenue contribution from the electro-optical industry came in as the second highest within the ATE segment with its contribution rate of 26.7% while the semiconductor industry contributed approximately 24.0% to the ATE segment of the Group. In 1H2022, while revenue from the electro-optical segment mainly derived from the module upgrade of the Group's existing smart device test solutions, the Group is working on certain prototype projects for new sensors application in the next-generation smartphone and its peripherals.

On the other hand, the semiconductor industry is cyclical and trends of inventory building and correction are part of the cycle. While some inventory correction is taking place, the industry backdrop suggests some signs of growth tailwinds driven by the increasing semiconductor content in multiple industries and the evolvement of conventional chip to intelligent chip with more complexity and functionality. Against this backdrop, the Group is well positioned to embrace the new opportunities presented in the ATE segment.

The Group experienced a slight decrease in the profit before taxation by 4.2% from RM28.0 million in 2Q2021 to RM26.8 million in 2Q2022, mainly due to changes in product mix. On the other hand, for the first half of 2022, the Group profit before taxation increased by 10.6% from RM53.7 million in 1H2021 to RM59.4 million in 1H2022 owing to a relatively higher revenue mix contribution from the automotive segment in 1H2022 where margin from this segment was generally higher. However, to a certain extent, these positive margin developments were partially offset by the ongoing cost pressures from key component shortages and rise in direct and indirect labor cost.

("PCB" or "Company")

Notes To The Interim Financial Report For Period ended 30 June 2022

#### 2) Factory automation solutions

After experiencing a drop in revenue in the first quarter of 2022, the FAS segment recorded a double-digit revenue growth at 20.5% during the second quarter of 2022 as compared to the corresponding quarter in 2021. Consequently, the overall revenue from the FAS segment in 1H2022 increased by approximately 7.8% to RM76.3 million from RM70.8 million in 1H2021. Notably, the FAS segment gained its revenue momentum from the consumer and industrial products segment which was dominating the FAS segment with its contribution rate of 46.2% in 1H2022. In terms of its revenue growth, the consumer and industrial products segment grew substantially by 63.1% in 1H2022 as compared to 1H2021. Revenue contribution from the electro-optical segment and medical devices segment each contributed 29.8% and 19.4% respectively to the FAS segment.

Generally, the demand for the Group's proprietary i-ARMS (intelligent Automated Robotic Manufacturing System) across various segments has positively contributed to the FAS segment in a sustainable manner. With the growing emphasis on industrial automation and smart manufacturing combined with digital transformation and the growth of data analytics, such trend and revolution which are crowned as the backbone of Industry 4.0, are seen being adopted across many businesses in a massive way. Adding further to the pressure are factors such as the shortage of skilled labour, rising wage costs and stringent health and safety requirements, many manufacturing facilities and operations have stepped up its effort in shifting towards factory automation for speed, flexibility, efficiency, productivity and precision.

Owing to an increase in the revenue product mix with better profit margin, the FAS segment recorded a higher profit before taxation by 78.8% to RM6.7 million in 2Q2022 (2Q2021: RM3.8 million) and 72.4% to RM10.3 million in 1H2022 (1H2021: RM6.0 million).

#### 3) Smart control solution system

The products and solutions in this segment entail project management, smart building solutions and trading of materials.

The smart control solution system segment recorded a decrease in revenue to RM70,000 in 2Q2022 (2Q2021: RM0.1 million) and RM0.1 million in 1H2022 (1H2021: RM0.2 million).

This segment achieved a higher loss before taxation at RM0.8 million in 2Q2022 (2Q2021: RM0.7 million) due to higher overhead cost while the loss before taxation in 1H2022 and 1H2021 remained the same at RM1.6 million.

#### Notes To The Interim Financial Report For Period ended 30 June 2022

Performance of the respective operating segments which includes inter-segment transactions in 2Q2022 as compared to 1Q2022 are analysed as follows:

#### 1) Automated test equipment

In 2Q2022, revenue from the ATE segment increased by RM3.1 million to RM133.6 million (1Q2022: RM130.5 million), representing an increase of 2.4%. The increase was mainly due to higher project delivery from the semiconductor segment which was driven by the increasing semiconductor content in multiple industries and the evolvement of conventional chip to intelligent chip with more complexity and functionality.

The ATE segment recorded a lower profit before taxation by 17.5% to RM26.8 million in 2Q2022 (1Q2022: RM32.6 million) mainly due to cost pressures from the rise in direct and indirect labor cost.

#### 2) Factory automation solutions

The FAS segment recorded an increase in revenue to RM42.5 million in 2Q2022 (1Q2022: RM33.7 million), representing an increase of 26.0% as a result of the project delivery from the medical devices segment.

In tandem with the increase in revenue and favorable changes in its product mix, the FAS segment witnessed an increase in profit before taxation to RM6.7 million (1Q2022: RM3.6 million).

#### 3) Smart control solution system

The smart controls solution system segment recorded a higher revenue in 2Q2022 amounting to RM70,000 (1Q2022: RM33,000), owing to higher number of projects delivered in 2Q2022.

The smart controls solution system recorded similar quantum of loss before taxation of RM0.8 million in 2Q2022 and 1Q2022.

#### 16 Prospect

Like many others in the industry, the Group faced multiple challenges post COVID-19 pandemic and with the current geopolitical tensions and inflationary situation, the supply chain operation has been a key factor in the Group's operation. The Group acknowledges the importance of being vigilant and reactive in its supply chain planning to ensure agility in this highly evolving situation. While the supply chain state of affairs has improved somewhat versus two years ago, the Group is fortunate that it has the ability to adapt to its inventory stock up approach on the back of its strong level of operating cash built over the years.

As the Group embraces the second half of 2022, the Group believes it is entering a period of encouraging growth on the back of its strong order fulfillment in tandem with its key segments focus that is largely driven by the wave of the underlying major global trends. The Group continues to witness such structural shift in the rapid adoption of technology and intelligence across different segments in the global industries. Ranging

("PCB" or "Company")

#### Notes To The Interim Financial Report For Period ended 30 June 2022

from automotive and communication to industrial and consumer electronic markets, the ubiquity of semiconductors and fast intelligence microprocessors coupled with the application of optics and photonics have provided the Group the optimism for its sustainable long term prospects.

The Group remains steadfast in its focus in diversifying its geographical presence, products and solutions as well as across different business segments in keeping with its high growth and margin over the long term horizon. Case in point – the Group's rapid transition to the automotive segment saw growing revenue and encouraging order book volume where such momentum was generally fueled by the emergence of electric vehicles, whose influence extends far beyond the automotive industry. This evolution, along with other development such as self-driving technologies entails huge opportunity for the Group. Following this trend and given the Group's comprehensive product portfolio within the segment that covers end-toend solutions, the Group is ready to reinforce its growth path in the automotive industry.

As part of the Group's geographical diversification approach, the initiation and commitment in establishing its presence outside of Malaysia are a testament of having a deep and strong foothold expansion in key region that serves as important key markets for its business segments. The recent establishment of Pentamaster Technology (Jiangsu) Limited and Pentamaster Automation (Japan) Co., Ltd, have since led to revenue from China and Japan showing signs of growing traction. Currently, both China and Japan are in the Group's top five markets. As it is, the Group has set its eyes on Germany for its next geographical expansion with Germany being a main market in automotive industry. By next year, Indonesia and the Middle East will be the Group's next target for its factory automation and single use medical devices, respectively.

In the immediate term, besides the supply chain operation, the Group's current important focus is to build and maintain a stable workforce while retaining key talent. The Group acknowledged that the ongoing talent shortage would worsen with the establishment of multinational companies in Malaysia and the operation expansion of existing semiconductor players in the market. It is therefore imperative for the Group to evaluate its current workforce's needs in meeting its business objectives and strategies. This evaluation, which includes constructing a career development road map for career progression and reskilling the workforce to stay competitive besides making adjustments to the remuneration package, are of importance for the Group in its growth trajectory.

Overall, the Group is optimistic on achieving another record year in 2022, while mindful of the current headwinds in derailing its delivery order on hand according to the scheduled timeline. Over the long run, the Group's growth initiatives are guided by its "Grand Roadmap & Key Focus 2022-2025", which aims towards achieving a solid and sustainable business growth through the implementation of its various core strategies that includes product innovation, expansion and diversification, segmental and geographical diversification, supply chain ecosystem development as well as capacity and capabilities building.
