#### **3. GROUP'S PROSPECTS**

The Group is principally involved in retail, trading, manufacturing, exporting and marketing pottery, porcelain products, ceramics wares and ornaments, construction, property investment, property development, transportation and logistics business as well as financial services. To minimise over-reliance on the Group's existing businesses, the Group has constantly been exploring new business opportunities to gain additional income streams.

CSH Network's moneylending business is expected to continue to grow as it plans to extend its moneylending services to untapped customers which it perceives to be underserved by banks or licensed financial institutions.

Even though CSH Group presently does not have any ongoing construction and property development projects, it will continue to explore other viable opportunities via joint venture or bidding for a suitable project to revive its construction and property development segments.

As part of the Group's efforts to search for new business opportunities to expand its existing business, CSH's wholly owned subsidiary, Alliance EV Sdn Bhd ("AEV") is presently collaborating with BYD Malaysia Sdn. Bhd. ("BYD") to venture into the business of distribution of electrical vehicles ("EV") and providing after-sales services for EV in the country to drive its transportation and logistics business forward particularly in the supply of EV for the logistics industry ("Project EV").

The long-term prospect and outlook of the EV industry remained positive, but it would require extensive resources such as considerable capital investments and working capital to be injected into the business for the setting up of the local assembly plant and the 4S service centre, employment of highly-skilled manpower, procurement of advance technologies and machineries and aggressive marketing initiatives to create brand awareness and promote adoption of EVs in the market.

Taking cognisance of the above, AEV will adopt cautious measures to implement and execute its plans in stages. With the Approved Permits obtained from MITI, AEV has been actively preparing the import and shipments of BYD T3 commercial EV ("BYD T3") into the country for distribution. AEV will continue to work closely with BYD to commence the distribution of BYD T3 with the subsequent plan to set up the local EV assembly plant on the Tanjung Malim Land. As such, AEV expects to launch the sales of BYD T3, a compact fully electric van to cater to the rising demand in the logistics and courier industry in reducing their carbon footprints in the near future.

In addition, CSH is also tapping on Dato' Goh Soo Wee (the newly appointed Executive Director of the Company) who has more than 20 years of extensive knowledge and experience in the distribution of private, commercial, and heavy vehicles as well as the vehicle assembly business to spearhead and oversee the Group's EV business. Further, CSH also intends to leverage on the competency and network of Dato' Goh Soo Wee to source for potential partners and/or investors to carry out and realise the Project EV in collaboration with BYD and eventually expand into other commercial and heavy EV such as buses, trucks and others in the future to create an EV ecosystem.
