B1 ANALYSIS OF PERFORMANCE

The Group's revenue of RM94.6 million for second quarter of 2023 was RM32.2 million higher than the RM62.4 million revenue reported in the corresponding quarter of preceding year. The Group's revenue for the 6 months ended 30 June 2023 was RM187.3 million, representing RM65.4 million increase as compared to revenue of RM121.9 million recorded in the corresponding period of preceding year.

The Group recorded a profit before tax of RM7.3 million in the second quarter of 2023, which was decreased by RM4.4 million as compared to profit before tax of RM11.7 million reported in the corresponding quarter of preceding year. Profit before tax for the 6 months ended 30 June 2023 was RM18.3 million, representing a decrease of RM4.9 million as compared to profit before tax of RM23.2 million recorded in the corresponding period of preceding year.

Increase in the Group's revenue during the current quarter and period ended 30 June 2023 as compared to the corresponding quarter and period of preceding year was mainly due to revenue contributed from the energy efficiency business and higher progress recognition for construction projects.

Lower profit before tax recorded in current quarter and period ended 30 June 2023 as compared to corresponding quarter and period of preceding year was due to lower profit recognition from property development project as the project was towards completion stage and higher loss recorded by agriculture segment, offset with profit contributed by energy efficiency business. Further, the Group recognised an one-off impairment loss on trade and other receivables and provision for slow moving stock of total RM6.0 million from manufacturing segment.

Setting aside the one-off and non-recurring loss of RM6.0 million recognised in current quarter and period ended 30 June 2023, the profits before tax of the Group would be RM13.5 million and RM24.4 million respectively, which were RM1.8 million and RM1.2 million higher than corresponding quarter and period of preceding year respectively.

a) Property development & construction

The property development & construction segment recorded RM48.0 million revenue for the second quarter of 2023, which was RM14.2 million higher than RM33.8 million recorded in the corresponding quarter of preceding year. The segment's revenue for the 6 months period ended 30 June 2023 of RM80.3 million was RM17.0 million higher than RM63.3 million recorded in the corresponding period of preceding year.

Profit before tax of RM8.3 million from property development & construction segment for the second quarter of 2023 was reduced by RM1.6 million as compared to RM9.9 million recorded in the corresponding quarter of preceding year. The segment's profit before tax for the 6 months period ended 30 June 2023 of RM15.2 million was decreased by RM2.8 million as compared to RM18.0 million recorded in the corresponding period of preceding year.

The increase in revenue for the current quarter and period ended 30 June 2023 for property development & construction segment was mainly contributed by higher sales and construction progress from ongoing projects. Lower profit before tax for the current quarter and period ended 30 June 2023 resulted from lower profit margin of construction projects.

b) Manufacturing

The revenue of RM27.2 million from manufacturing segment for the second quarter of 2023 was RM0.5 million lower than RM27.7 million recorded in the corresponding quarter of 2022. The segment's revenue for the 6 months ended 30 June 2023 of RM50.0 million was RM7.7 million lower than RM57.7 million recorded in the corresponding period of preceding year.

The loss before tax of RM2.1 million from manufacturing segment for the second quarter of 2023 was reduced by RM5.5 million from profit before tax of RM3.4 million recorded in the corresponding quarter of 2022. The segment's loss before tax for the 6 months ended 30 June 2023 of RM0.9 million was RM7.6 million lower than profit before tax of RM6.7 million recorded in the corresponding period of preceding year.

The decrease in revenue manufacturing segment for the current quarter and period ended 30 June 2023 was mainly due to slowdown in global demand and rising inflation. Loss before tax was due to lower sales and one-off impairment loss on trade and other receivables and provision of slow moving stock with a total of RM6.0 million.

B1 ANALYSIS OF PERFORMANCE (continued)

c) Energy efficiency

The energy efficiency segment recorded a revenue of RM56.8 million (2022: RM Nil) and profit before tax of RM7.8 million (2022: share of profit from associate of RM2.0 million) in 6 months period ended 30 June 2023, generated from energy solution contracts and maintenance service contracts.

d) Agriculture

The agriculture segment recorded RM0.2 million revenue for 6 months period ended 30 June 2023, lower of RM0.6 million as compared to RM0.8 million recorded in corresponding period of preceding year.

The agriculture segment's loss before tax of RM2.1 million for 6 months period ended 30 June 2023 was RM1.0 million higher than loss before tax of RM1.1 million recorded in the corresponding period of preceding year.

Lower revenue and higher loss before tax reported in 6 months period ended 30 June 2023 was due to seasonal rainfall occurred in beginning of every year in Kelantan. The logging activities in current period ended 30 June 2023 were also temporary stopped while waiting for renewal of logging licence which was obtained in April 2023.

e) Others

The revenue from others segment for current quarter and period ended 30 June 2023 was fairly consistent with corresponding quarter and period of preceding year respectively.

The loss before tax of RM1.0 million recorded in current quarter ended 30 June 2023 was RM0.7 million lower than the loss before tax of RM1.7 million recorded in corresponding quarter of preceding year. The segment's loss before tax of RM1.6 million for 6 months period ended 30 June 2023 was RM0.8 million lower than the loss before tax of RM2.4 million recorded in corresponding period of preceding year. This was due to lower administrative expenses incurred in others segment.

B2 COMPARISON WITH IMMEDIATE PRECEDING QUARTER

The Group recorded revenue of RM94.6 million and profit before tax of RM7.3 million for the current quarter ended 30 June 2023 as compared to revenue of RM92.7 million and profit before tax of RM11.0 million for the immediate preceding quarter. The increase in revenue as compared to the immediate preceding quarter is mainly due to recognition of higher percentage of sales and construction progress from ongoing projects, whereas lower profit before tax was due to one-off impairment loss on trade and other receivables and provision of slow moving stock with a total of RM6.0 million recognised in current quarter.

B3 PROSPECTS FOR CURRENT FINANCIAL YEAR

The property market in Malaysia remains challenging. The recent increases in overnight policy rate in year 2023 will have a significant impact on the property market. Further, the shortage of skilled manpower, increase in construction material prices and labour cost will affect the progress and performance of property development and construction segment. The Group will continue to monitor and implement appropriate business strategies and cost rationalisation strategies in order to address the challenges and risks.

The supply chain disruption coupled with the rising costs of material and slow demand remain the major challenges that affect manufacturing operations. In view of the uncertainty of the global economy, the Group will continue to operate within the constraints, revisit the market demand, pricing strategies as well as rationalise the cost structure in order to stay competitive in the market.

The agriculture segment will continue facing challenges from the weather uncertainty, operating costs escalation and labour shortages issues. As such, the Group will continue to manage its risks and improve its operating processes as the Group believes agriculture segment will contribute positively to the Group with the anticipation of increasing demand and teak wood prices.

Global energy consumption continues to rise in 2023. The energy prices remain high. There is also a growing urgency to reduce energy consumption globally, espcially with the potential disruptions in gas and oil supplies. Governments are increasingly emphasizing climate change mitigation policies, greenhouse gas emission reduction, and energy efficiency initiatives. Amidst those global trends, the Group believes that the energy efficiency business presents a positive growth opportunity. Governments' support for environmental initiatives and the increasing focus on environment, social, and governance issues are expected to bolster the Group's result in the Energy Efficiency Division.

The global economy is facing an increasingly gloomy and uncertain outlook, the Group will remain resilient and vigilant to manage the associated risks in order to maintain the sustainability of the businesses.
