B. ADDITIONAL INFORMATION REQUIRED BY BURSA SECURITIES LISTING REQUIREMENTS

B1. Review of Group's Results for the Quarter Ended 30 June 2016

The Group posted an improvement in revenue of RM1.99m or 5% for the 2nd quarter of FY2016 as compared to the corresponding quarter in the preceding year. The improved performance was mainly attributable by the higher sales from the Malaysia operations for the quarter under review.

The profit before tax and profit after tax for the current quarter recorded the decrease of 18% or RM0.74m and 24% or RM0.67m respectively as compared to the corresponding quarter in FY2015.

While there has been an overall increase in revenue but decrease in profitability, was mainly due to the Vietnam operations had been impacted by lower production volumes and higher cost.

B2. Variation of Results Against Preceding Quarter

Against the preceding quarter, the Group's revenue increase by RM0.06m from RM38.15m the preceding quarter to RM38.21m. Profit before tax recorded an increase of 33% or RM0.86m for the quarter as compared to the preceding quarter. The profit after tax for the quarter was RM2.15m, representing a growth of 47% as compared to RM1.46m in the immediate preceding quarter. This was mainly attributed by a higher seasonally production volumes commencing this period.

Nevertheless, the quarter's result had also been impacted by professional fees, finance expenses and other expenses relating to the (a) corporate activities undertaken by the group namely, the acquisition of the remaining 25% in Polyplas Sdn Bhd and the proposed acquisition of 70% in Demand Options Sdn Bhd (b) other business development activities, resulting in slightly higher operating expenses in the quarter.

Company No. 633814-X (Incorporated in Malaysia)

B3. Prospects of the Group

The Management is looking forward to the seasonally busy period in the 2nd half of the year, especially in the 3rd quarter, and is expecting that production volumes will pick up for the rest of the year.

Over the longer term, the Management is generally cautious about the overall production volumes across the Group. On the news of the several multi-national customers (or their associate or related companies) who have announced their intention to close their Malaysian operations, the Management has been closely assessing and monitoring the situation, and has stepped up efforts and pre-empting to mitigate these risk by initiating business development activities as highlighted below. Furthermore, cost inflation in both Malaysia and Vietnam, for example, the minimum wages increase effective 1 July 2016 in Malaysia, will also have some impact on the profitability of the Group.

Notwithstanding, the Group is still committed to become a more comprehensive component manufacturing group and, has planned and implemented further investments or capital expenditures in capacities and/or machineries. As part of this plan, several initiatives were implemented including, but not limited to the following:

- (i) the Group has entered into share sales agreement on 28 June 2016 to acquire 70% equity interest in Demand Options Sdn Bhd ("DOSB")
- (ii) the Group via its subsidiary Ge-Shen Plastic (M) Sdn Bhd had on 19 July 2016 entered into a sale and purchase agreement to acquire a property to further increase its manufacturing and warehousing capacities.

The earlier estimated CAPEX for FY2016 was RM20m, but has now been revised to RM37.1m with the inclusion of the above mentioned property and other planned changes. The total spent-to-date as of 30 June 2016 is RM7.1m. The CAPEX is expected to be financed via internally generated cash flow and bank financing.

On the other hand, the Group continues to look at new technology and automation in improving capital intensity. This would improve the Group's engineering service capabilities as well as production efficiencies and productivity. Furthermore, the Management is looking at further methods to continue improving its capital structure as well as further integration between the subsidiaries of the Group, especially now with the planned acquisition of DOSB.

These initiatives, done in conjunction with the business development activities and marketing efforts of the Group, are expected to contribute to the increase in production volumes in the near future.

Macro-economically, conditions are expected to remain challenging. While the Brexit vote has no direct impact on the Group, globally there has been substantial increase in economic, political, and institutional uncertainties which may impact consumer spending. In Malaysia, the reduction in Overnight Policy Rate ("OPR") is expected to be favourable to Ge-Shen's capital spending activities. The stability of the USD against the MYR will also impact on the profitability of the Group in the future.
