B1 Review of performance

For the Quarter

The Group recorded a revenue of RM55.8 million during the current quarter which represents an increase of 36.6% or RM14.9 million as compared to the preceding year corresponding quarter's revenue of RM40.9 million. Previous year's revenue was affected by the plants shut down due to the revocation of manufacturing licences from 9 Jan 2017 to 6 Mar 2017 for Chemor Plant, and to 5 May 2017 for Ipoh Plant. Production activities were halted then and sale deliveries were from available inventories. In contrast, all the production plants are operating 24 hours a day during the current quarter since the receipt of the manufacturing licences. Further, the commissioning of the new Plant A in December 2017 has also boosted the production output and therefore the sales for the current quarter.

The Group's pre-tax profit was RM4.6 million for the current quarter, an increase of RM10.0 million in comparison to the preceding year corresponding quarter's loss of RM5.4 million. The significant improvement was due to improved sales during the current quarter arising from full production activities in comparison to the plants shut down in preceding year as mentioned above. In addition, foreign exchange loss arising from the fluctuation of United State of America Dollar ("USD") against Ringgit Malaysia ("RM") is lower by RM1.3 million in comparison to the preceding year corresponding quarter.

Year-to-date

The Group's revenue for the current financial period amounting to RM160.0 million, an increase of RM25.6 million or 19.1% in comparison to RM134.4 million achieved in the previous financial period. The current production capacity was boosted with the commissioning of Plant A in December 2017. This, together with all the production plants operating 24 hours a day since the start of the current financial year, were able to meet the increased orders. In contrast, previous year's revenue was affected by the plants shut down due to the licence revocation mentioned above.

The Group's pre-tax profit for the current financial period of RM11.4 million was RM5.6 million or 97.4% higher in comparison to the previous financial period's profit of RM5.8 million. The pre-tax profit for the current period has increased despite the increase in foreign exchange loss of RM2.0 million arising from the fluctuation of USD against RM, mainly due to the improved sales from increased orders and full production activities.

B2 Results comparison with preceding quarter (cont.)

The Group recorded a revenue of RM55.8 million during the current financial quarter which represents an increase of RM1.4 million or 2.6% as compared to the preceding financial quarter's revenue of RM54.4 million. The production capacity was boosted with the commissioning of Plant A in December 2017 to meet the increased orders.

The Group's pre-tax profit for the current quarter of RM4.6 million was RM0.8 million higher in comparison to the preceding quarter's profit of RM3.8 million. Operating expenses for the current quarter decreased by about RM1.3 million mainly due to lower selling and distribution expenses. However, this decrease was off-set by higher foreign exchange loss arising from the weakened USD against RM. Overall, the improved pre-tax profit was due to the higher revenue.

B3 Commentary on Prospects

Barring any unforeseen circumstances, the outlook for the Group is expected to be satisfactory given that the Group has expanded its tablet and capsule production facility and actively securing new overseas markets and registration of new products. However, the fluctuation of RM against the USD and the resulting unrealised foreign exchange gains / loss may cause some fluctuations to our RM denominated financial results together with the increase in depreciation and interest expense arising from the new expansions.

The Group will continue to enhance it's competitive edge by continually placing emphasis on research and development and improving its production processes to achieve better efficiency.

B4 Profit forecast, profit guarantee and internal targets

The Group did not provide any profit forecast, profit guarantee and internal targets in any public document or any announcements made.

Our Company had defended the suit and counterclaimed against the Plaintiffs to invalidate the subject patent.
