B 3 Prospects

The global economy continues to experience increased volatility amid uncertainties over the direction of fiscal and monetary policies in the advanced economies. While overall growth performance in most emerging economies, including in Asia, will be affected by these developments, domestic demand will continue to support the overall growth performance. The domestic growth prospects are also being augmented by targeted policy measures.

Amid the uncertain global economic conditions, the Malaysian economy recorded a growth of 5.0% during the third quarter of 2013 with domestic demand continuing to drive growth, supported by public and private sectors' investments under the Tenth Malaysia Plan and Economic Transformation Program. However, the increase in electricity tariff which is to take effect from 1 January 2014 will have adverse impacts on the Group's margins. The Group will continue to focus on improving its cost efficiencies to mitigate the effect of expected inflationary pressures following the rise in the electricity tariff.

Barring unforeseen circumstances, the Board is optimistic that the Group will remain profitable for the forthcoming quarter.

B 4 Variance of actual and profit estimate
